1. RISK FACTORS

The Issuer believes that the following factors may affect its ability to fulfil its obligations under the Tranche 3 Notes.

*An investment in the Tranche 3 Notes involves a high degree of risk. Each potential investor should carefully consider the following risks, together with other information provided in this Offering Memorandum, in deciding whether to invest in the Tranche 3 Notes. The occurrence of any of the events discussed below could materially adversely affect the Issuer's business, financial condition or results of operations. If these events occur, the trading prices of the Tranche 3 Notes could decline, the Issuer may not be able to pay all or part of the interest on or principal of the Tranche 3 Notes, and holders of the Tranche 3 Notes (the "**Holders**" and each a "**Holder**") may lose all or part of their investment. Additional risks not currently known to the Issuer or that they now deem immaterial may also harm the Issuer and affect the Holders' investment.*

This Offering Memorandum contains "forward looking" statements that involve risks and uncertainties. Actual results may differ significantly from the results discussed in the forward looking statements. Factors that might cause such differences include those discussed below and elsewhere in this Offering Memorandum.

1.1 RISKS RELATING TO THE ISSUER AND THE GROUP

1.1.1 Risks related to the Issuer's business activities

The Group bears risks in connection with possible acquisitions and investments. These risks include unexpected liabilities, greater indebtedness, higher interest expenses, higher compensations and challenges with respect to the integration of newly acquired businesses and achieving anticipated synergies and economies of scale. Furthermore, new properties may not develop as favourably as expected.

The Group is active as developer of real estate properties which it keeps as long-term holding in its portfolio ("**Build & Hold**" business segment). Core of the Build & Hold business segment is Aggregate's subsidiary Quartier Heidestrasse GmbH. Quartier Heidestrasse GmbH and its subsidiaries are currently developing Quartier Heidestrasse in Berlin, a neighbourhood development scheme with a mix of residential and office buildings, commercial use, public streets and squares, as well as open green spaces. The success of the project mainly depends on the ability of the Group to generate earnings from rentals. As a result, the performance depends largely on the amount of rental income generated, which in turn is significantly dependent on the vacancy levels of the units. If the Group is not able to let these properties after completion of the project at the currently expected level of rent or at all, or should the Group incur an increase in vacancy levels in the future, this could have an adverse effect on the Group's financial results as a result of their nature of "investment properties under construction" valued at their anticipated gross development value.

Investments in property also involve other considerable risks. The acquisition of additional real estate needs to be financed, partially by taking on additional debt with banks or by issuing new shares or debt in the capital markets or by a combination thereof. If the Group is unable to obtain the necessary capital on reasonable terms or at all, it may be unable to make further acquisitions to the extent envisaged. Any additional debt incurred in connection with future acquisitions could have a significant negative impact on the Group's loan-to-value ratio ("**LTV-Ratio**") and could result in higher interest expenses for the Group. If Aggregate or its respective Group companies were no longer able to obtain the debt or equity financing they need to acquire additional land for development, or if they were able to do so only on unfavourable terms, its further business development and competitiveness could be severely constrained. In addition, acquisitions could result in a breach of financial covenants.

Furthermore, the properties acquired by the Group may suffer from hidden defects, such as contamination, and may thus require significant investments. In addition, in the course of the acquisition of companies or residential and other property portfolios or developable land, specific risks may not be, or might not have been, identified or evaluated correctly. As a result, legal and economic liability may be, or might have been, overlooked or misjudged. Although sellers typically make various warranties in purchase agreements that the Group companies enter into in connection with such property acquisitions, it is possible that these warranties do not cover all risks or that they fail to cover such risks sufficiently. Additionally, a warranty made by a seller may be unenforceable due to the seller's insolvency or for other reasons. In some cases, a seller makes no representation or warranty as to the completeness and correctness of the information that is made available in the context of due diligence, or as to whether such information remains correct during the period between the conclusion of the due diligence and the closing of the relevant acquisition.

Consequently, in particular in the case of acquisitions of large-volume properties, Aggregate or its Group companies, as the case may be, could have overestimated earning potential upon development, underestimated the rental and cost risks and consequently paid a purchase price higher than the portfolio's actual value for the Group. Furthermore, the properties could be inaccurately appraised by the Group for other reasons, even if they were acquired on the basis of valuation reports and due diligence reviews. Therefore, neither a particular target return from rentals, nor, if applicable, a certain price upon resale can be guaranteed with respect to acquired property.

Moreover, the Group is active as a real estate developer focused on the construction and sale of real estate to third-party buyers (mainly via forward sales) (“**Build and Sell**” business segment). The core of this business segment is Aggregate’s stake in VIC Properties S.A. (“**VIC**”). VIC develops real estate projects in Portugal, focused on large scale development schemes with a predominant focus on residential projects. Substantial funds of the Group are tied up in various real estate development projects in Portugal, especially in Lisbon and its surrounding areas, but also targeting pipeline projects in Porto and the Algarve region, that may not be realised until the relevant project is completed. It is currently expected that the main development projects Prata Riverside Village and Matinha in Portugal will be completed in 2023 and 2027, respectively. Any delay in the completion or additional costs in connection with such projects may cause liquidity risks for the Group and thus Aggregate.

Furthermore, the Group is active in investing in financial real estate assets (“**Financial Real Estate Assets**” business segment). On 15 December 2019, Aggregate entered into a call/put option agreement with ADLER Group S.A. (the “ADLER Group”) (formerly ADO Properties S.A.) to sell 50.97% of the shares in Consus Real Estate AG (“**Consus**”), representing 69,619,173 shares of Consus. On 29 June 2020, the ADLER Group exercised the call option for the Consus shares and Aggregate received approximately 22.5% of the voting rights in the ADLER Group as consideration. There is no assurance that the anticipated benefits of the acquisition of the ADLER Group shares will realize in full or at all. In particular, the Group may not have been in a position to adequately and sufficiently identify and assess all risks in connection with the exercise of the call/put option agreement and acquisition of the ADLER Group shares. It is possible that the Group will carry out further acquisitions and investments in financial real estate assets in the future. Such transactions involve certain risks. The Group may not be able to realise anticipated synergies, future earnings, transfer of know-how or other benefits that it intends to achieve from the acquisitions and investments. The Group cannot guarantee that any acquisition or investments will yield benefits that are sufficient to justify the expenses the Group has incurred.

The occurrence of any of the aforementioned risks could have material adverse effects on the assets, financial position, and results of operations of the Group and thus Aggregate.

The business success of the Group depends on a small number of projects and inventories and problems with these inventories could have a disproportionate impact on the business success of the Group and thus Aggregate.

The business success of the Group depends on a small number of large-scale projects and inventories, especially the projects developed in Berlin (Quartier Heidestraße) and in Portugal by VIC Properties S.A., which account for a substantial portion of sales. If in addition to the general customer dependency in form of a bulk risk associated with this, there is also the risk that possible delays or problems in completing these projects, changes in demand in specific geographic markets or a change of customer preferences could have a disproportionate impact on the business success of the Group.

Aggregate may not be able to acquire real estate properties or participations due to a lack of attractive properties or participations available for purchase or competition for such acquisitions.

The extent of Aggregate’s success is also dependent on the Group’s ability to acquire suitable real estate properties or participations on a continuous basis in economically attractive regions for appropriate prices. Acquisitions can only be implemented if attractive properties that meet its investment criteria are available for purchase and if the prices for such properties are reasonable. A lack of attractive acquisition opportunities could drive up prices for the type of properties the Group seeks to acquire. In addition, whether such properties can be acquired depends on a number of factors over which the Group has limited or no control. These include, among others, the general economic conditions with corresponding impacts on the supply and demand situation with respect to new and existing properties, financing opportunities as well as the costs associated with the development, conversion and refurbishment of properties.

Given the current strong demand for residential real estate in Europe and particularly in Germany, there may be fierce competition for attractive properties, and acquisition opportunities may be unavailable or available only on unfavourable terms (i.e., at higher prices and lower yields). Competitors with acquisition strategies similar to the Group may possess greater financial resources and lower cost of capital than Aggregate and may therefore be able to offer higher prices.

In addition, during the acquisition of real estate properties and participations, unforeseen problems can arise as a result of substantial economic or legal obstacles. Some transactions may be subject to a number of closing conditions and certain rights of withdrawal. If conditions precedent set out in a purchase agreement are not fulfilled or if the parties fail to reach an agreement with respect to, among other things, the loan documentation, such transaction may not occur in the form or within the timeframe originally anticipated, or at all. In the event Aggregate or its Group companies are unable to complete an anticipated acquisition, the Group may have to bear any associated transaction costs or compensate seller’s losses.

Furthermore, Aggregate relies on access to financial markets in order to refinance its debt liabilities and secure acquisition financing. Aggregate might consider financing its future growth also through equity capital markets measures. In this regard, Aggregate may be dependent on the general economic environment and the level of demand in the capital markets as well as further factors, which may lie outside its control. Any worsening of the economic environment or restrictions in the financial markets may reduce its ability to refinance its existing or future liabilities or gain access to new financing. Aggregate’s counterparties may not be able to fulfil their obligations under the respective agreements due to a lack of

liquidity, operational failure, bankruptcy or other reasons. Furthermore, an increase in interest rates could adversely impact its business by making financing more expensive and might force Aggregate to secure financing under economically unattractive conditions, which could, in turn, require Aggregate to dispose of properties or participations. A forced sale of properties or participations in a timely manner may only be possible on unfavourable terms and for a purchase price below market value.

There is no guarantee that Aggregate and its Group companies will manage the acquisition of new properties effectively. Any inability to complete anticipated acquisitions or acquire and develop properties could impair its strategy to realize growth opportunities by increasing its portfolio and to capitalize on economies of scale.

If Aggregate and its Group companies are not able to identify and acquire suitable properties at reasonable prices, this could have a material adverse effect on business, financial condition and results of operations of Aggregate.

The Group may achieve lower revenue from its business than estimated.

Estimating the future value of a real estate property is inherently subjective due to the individual nature of each real estate property and is heavily affected by broader market conditions beyond the control of the Group. Factors including changes in regulatory requirements and applicable laws (including building, zoning and environmental regulations and taxation), transport and infrastructure policies, economic conditions, the condition of the financial markets, the financial condition of potential customers, applicable tax laws and interest and inflation rate fluctuations contribute to the uncertainty and volatility of project estimates, including valuations.

The value of the Group's real estate development projects is estimated only and is ascertained on the basis of assumptions (including assumptions regarding factors such as demand for residential or commercial real estate properties and average sales prices of residential real estate properties). These assumptions can turn out to be incorrect. There can be no assurance that the value of the Group's real estate properties reflects the future sales prices. Any failure to sell the estimated number of residential or commercial real estate properties or selling at prices lower than expected may result in a lower revenue than estimated.

In addition, the Group's ability to increase its income from property development is dependent on its ability to increase occupancy and rent levels of the developed residential real estate properties before such properties are sold. Consequently, the loss of current tenants could lead to a reduction or loss in rental income if the relevant member of the Group is not able to find new tenants in a timely manner.

Furthermore, if relationships with key tenants were to deteriorate, if tenants fail to fulfil their rental payment obligations, if tenants were to reduce the amount of space they lease from the Group or terminate their rental agreements, the Group may suffer a decline in rental income, especially if the Group is unable to maintain previous rental rates with the new tenants.

Any deviation from the estimated value to the realised value, including as a result of inaccurate valuations, could have a material adverse effect on the business, financial condition and results of operations of the Group.

The Group is exposed to certain risks in connection with construction projects, including construction defects and delays, availability of contractors, cost-overruns as well as health, safety and environmental risks.

With respect to the construction of development projects, Aggregate or any member of the Group is exposed to various risks relating to defective construction work or the use or installation of defective construction materials by third-party suppliers or contractors. The warranty, guarantee or indemnity protection set forth in the contracts with such third-party suppliers and contractors, and the arrangements with insurance providers to insure against certain risks, may prove to be insufficient or may not adequately protect Aggregate or any member of the Group against relevant risks. Furthermore, the Group may not be able to enforce claims in the respective amount, or at all, due to the third-party contractor's or supplier's insolvency or for other reasons. Significant liabilities may not be identified or may only come to light after the expiry of warranty, guarantee or indemnity claims. Any claims relating to defects arising from or related to one of the development projects of the Group may give rise to contractual or other liabilities, which can extend, depending on the relevant contractual or statutory provisions, for five years following completion of the development project and may not be covered by claims against any contractors or suppliers of the Group.

Moreover, the Group's ability to successfully complete development projects on time, at the anticipated quality or at all, depends on several factors. Construction work may involve higher costs than originally planned, and unforeseen additional expenses may be incurred leading to a deteriorating financial situation of the Group. For example, the Group may fail to meet standards and/or deadlines agreed with contractors and service providers and there can be no assurance that the Group will be able to hire qualified and reliable contractors. Contractors and service providers carrying out construction work may be adversely affected by economic downturns, insolvencies or any other risks inherent to the provision of construction services. These risks include damages caused by severe weather conditions (e.g., fires, floods or natural disasters) and construction-related delays due to personnel shortages, strikes, building site safety, governmental permits or restrictions on

construction activity, shortage of or inability to source building materials and transportation issues, any of which may be influenced by the respective parties' reliance on third parties. Among others, any of the aforementioned risks may result in significant cost overruns and project delays. For example, in connection with the ongoing Coronavirus pandemic, national, regional or local authorities have mandated social distancing measures which resulted in decreased activity on some of the Group's construction sites. Such restrictions, or a complete halt of construction activity may be mandated again in the future. Furthermore, the Group is exposed to cost increases in connection with services of contractors, service providers and sub-contractors. Any cost increases could adversely affect the ability of the Group to earn the projected yields related to the development projects.

There are uncertainties regarding whether, when and under what constraints and/or subsidiary conditions approval for the projects is granted under public construction law, *i.e.* Aggregate partly relies on the individual authorities exercising discretion. In addition, disputes with residents and neighbours may significantly delay or negatively influence the granting of approvals. These circumstances may mean that planned development and construction measures cannot be executed for the price assumed, within the timeline planned, or not at all.

Developing real estate entails certain health, safety, and environmental (“HSE”) related risks. A significant HSE incident at one of the development projects of the Group or a general deterioration in the Group's HSE standards could put employees, contractors or the general public at risk of injury or death and could lead to litigation, significant penalties or damage to the Group's reputation. Aggregate or any member of the Group may be liable for the costs of removal, investigation or remediation of hazardous or toxic substances (including asbestos) located on, under or in a property currently or formerly owned by the Group, whether or not Aggregate or any member of the Group caused or knew of it. Furthermore, the Group may also be deemed to be responsible for latent or historic risks from unknown contamination, or may incur greater liability or costs than originally anticipated. The costs of remediation, investigation or defending against claims can be substantial, and they may not be covered by warranties and indemnities from the seller of the affected land plot or property or by any insurance policies of the Group, or may prove unenforceable. Any failure in HSE performance, including any delay in responding to changes in HSE regulations, may result in penalties for non-compliance with relevant regulatory requirements. Monitoring and ensuring HSE best practices may become increasingly expensive for the Group in the future if additional HSE requirements were to come into effect.

Aggregate or any member of the Group is also exposed to a liability risk arising in connection with non-compliance with or introduction of new building codes or environmental regulations. It is also possible that landlord responsibilities could be further expanded with respect to fire protection and environmental protections, which could require additional development, refurbishment, maintenance and modernization measures or result in lower proceeds from the sale of real estate properties. The project cost of such measures is based on the assumption that the required permits are issued promptly and in consistence with Aggregate's plans.

The occurrence of any of the aforementioned risks could have material adverse effects on the assets, financial position, and results of operations of the Group and thus Aggregate.

Land plots and real estate properties can be illiquid assets and could significantly impede the ability of the Group to respond to adverse changes in the real estate or financial markets.

Land plots and real estate properties can be relatively illiquid assets because they may not be easily sold and converted into cash when markets deteriorate. The Group may be required to sell entire land plots or properties in certain circumstances, including due to changes in development plans, failure to obtain required building permits, the decision not to proceed with the development, changes in economic or property market conditions, negative political developments affecting the residential real estate or commercial letting market, including any expropriation or nationalization of real estate property, rental caps or financial distress. The illiquidity of real estate properties may affect the ability of the Group to dispose of or liquidate parts of its development portfolio in a timely fashion and/or at satisfactory prices when required or desirable, and the Group may incur additional costs until it is able to sell such land plots or properties. This could have a material adverse effect on the business, financial condition and results of operations of the Group.

Future offerings of debt or equity securities by the ADLER Group may adversely affect the market price of the ADLER GROUP shares held by Aggregate and future capitalisation measures could lead to a substantial dilution of Aggregate's interests in the ADLER Group and ultimately the value of the asset.

On 15 December 2019, Aggregate entered into a call/put option agreement with ADLER Group S.A. (the “**ADLER Group**”) (formerly ADO Properties S.A.) to sell 50.97% of the shares in Consus Real Estate AG (“**Consus**”), representing 69,619,173 shares of Consus. On 29 June 2020, the ADLER Group exercised the call option for the Consus shares and Aggregate received approximately 22.5% of the voting rights in the ADLER Group as consideration. On 2 July 2020, ADO Properties (renamed to ADLER Group S.A.) announced a fully underwritten rights issue of EUR 450 million (the “**ADO Capital Increase**”) which was successfully completed by 21 July 2020. Aggregate subscribed to additional 6,932,909 shares, which brought its total holdings to 23,571,891 ADLER Group shares. Therefore, following the ADO Capital

Increase a total of 104,785,930 ADLER Group shares are outstanding with Aggregate's stake maintained at approximately 22.5% post completed rights issue.

Aggregate bears the risk that ADLER Group S.A. (the "ADLER Group") (formerly ADO Properties S.A.) may issue new shares in the future resulting in a declining market price of the ADLER Group shares and a dilution of its holdings in ADLER Group. The occurrence of any of the aforementioned risks could have material adverse effects on the assets and financial position of the Group and thus Aggregate.

Aggregate has a small number of employees in central functions and in senior management positions overseeing its business. Aggregate is dependent on recruiting and retaining qualified staff and employees in key positions. Any inability to retain or replace key personnel may be a challenge for Aggregate in the future.

Aggregate only has a small number of senior management executives responsible for managing its core business. The Group's success depends significantly on the performance and expertise of its management executives and the qualified employees in key positions, in particular, the management board members as well as other executives. It will be important for Aggregate to hire additional qualified employees to the extent that an expansion exceeds its available resources or to replace departed employees. Any unexpected loss of any of the key employees, also in connection with changes of internal structures at Aggregate, could have a detrimental effect. Any inability to recruit new highly-qualified management executives could impair the Group's growth and make it difficult for the Group to manage its business operations effectively.

The occurrence of any of the aforementioned risks could have material adverse effects on the assets, financial position, and results of operations of the Group and thus Aggregate.

Aggregate's risk management organisation could be insufficient or might not be updated in line with Aggregate's growth. Thus, risks could arise with respect to deviations of Aggregate's actual business performance from its business planning.

The Group's risk management and monitoring systems may not be adequate to support and effectively monitor Aggregate's business operations and prevent or detect inadequate practices, fraud and violations of law by Aggregate, other members of the Group, employees or third parties acting on behalf of the Group. Failure or alleged failure to comply with applicable law and regulation may result in legal proceedings, penalties, unfavourable media reporting, damage to the Group's reputation and other detrimental consequences. This may in turn have material adverse effects on the assets, financial position, and results of operations of the Group and thus Aggregate.

In addition, the data underlying Aggregate's business planning, especially revenue, income, and expenses, is largely based on forward-looking projections and estimates that take into account all of the insights gained up to the time the planning was prepared, historical figures, and the expectations of Aggregate's management board at the time the planning was prepared. Whether the assumptions and estimates in the planning will actually materialize is uncertain. There is a risk that the earnings and liquidity of the Issuer may not develop according to plan due to negative deviations from the earnings and expense expectations in the planning. Moreover, there is a risk that, due to planning deviations, the Issuer's liquidity situation may not permit the Issuer to make interest and principal payments due under various financing agreements, including the Notes, at the relevant due date either in whole or in part.

If the Group were to fail to suitably develop further its internal organisational, information, risk monitoring, and risk management structures, align these with the planned further growth of Aggregate and adapt them to a possibly changing environment for business operations in order to identify, assess, monitor, and manage potential risks as early as possible, unfavourable business or administrative developments could occur and incorrect decisions could be made that could have material adverse effects on Aggregate.

The occurrence of any of the aforementioned risks could have material adverse effects on the assets, financial position, and results of operations of the Group and thus Aggregate.

Aggregate could suffer material losses from damage that is not covered by insurance, or that exceeds its insurance coverage.

To cover damage that it or third parties might incur as a consequence of its business operations, Aggregate has taken out insurance contracts. However, insurance coverage is not unlimited, but subject to liability limitations and liability exclusions both in terms of the amount and with respect to the individual claim. Consequently, Aggregate could incur damage not covered by its insurance or exceeding coverage limits. In addition, Aggregate could fail to obtain sufficient insurance protection in the future or such coverage may only be available at significantly higher premiums. In the event of a large number of claims or any major loss, insurance contracts could be terminated by the respective insurance company, insurance premiums could be increased or insurance terms could become less favourable in any other respect. In addition, insurance companies could become insolvent, which may have an adverse effect on the value of the insurance contracts entered into by Aggregate with such insurance companies.

The occurrence of any of the aforementioned risks could have material adverse effects on the assets, financial position, and results of operations of the Group and thus Aggregate.

The current IT-systems and protection measures with regard to sensitive and confidential information of the Group could be prone to faults, insufficiently secure or not fully functional.

The Group is dependent on having constantly accessible and functional information technology (IT) systems in order to carry out its business. In addition sensitive and confidential information, especially customer information, must be protected at all times against unauthorised access by third parties. The current systems and protection measures could be prone to faults, insufficiently secure or not fully functional. Any interruptions, failures, manipulation or damage to these information technology systems, including as a result of the outsourcing of property and facility management functions as well as Aggregate's IT systems, could lead to delays or interruptions in Aggregate's business processes. A range of factors beyond Aggregate's control, such as telecommunication problems, software errors, inadequate capacity at IT centres, fire, power outages, attacks by third parties, computer viruses and the delayed or failed implementation of new computer systems, could interfere with the availability of its IT systems. Any material disruption or slowdown of Aggregate's systems could cause information to be lost. Aggregate's existing safety systems, data backup, access protection, user management and IT emergency planning may not be sufficient to prevent information loss or disruptions to its IT systems. In addition, if changes in technology cause Aggregate's IT systems to become obsolete, or if Aggregate's IT systems are inadequate to handle its growth, its reputation may be damaged and Aggregate may incur additional unplanned expenses. Future technological developments may require Aggregate to spend substantial funds to prevent and repair malfunctions of Aggregate's IT systems. There can be no assurance that any of Aggregate's detected malfunctions will not be repetitive in the future despite the installation of additional security measures. Furthermore, the integration of IT systems of newly acquired real estate companies may cause the incurrence of additional costs and, simultaneously, lead to malfunctions of Aggregate's IT systems, which, in turn, may disrupt its real estate activities in multiple ways.

The occurrence of any of the aforementioned risks could have adverse effects on the assets, financial position, and results of operations of the Group and thus Aggregate.

Infringements of the General Data Protection Regulation and/or failures to safeguard confidential data could expose Aggregate to significant regulatory fines or penalties, liability and/or reputational damage.

The Regulation (EU) 2016/679 ("General Data Protection Regulation" or "GDPR") came into force on 25 May 2018. The General Data Protection Regulation standardises the rules for the processing of personal data by private companies, public companies and public authorities. As well as additional amendments to the rules, the regulation also increased the possible fines for data protection violations. The maximum fine for particularly serious violations is now EUR 20 million or 4% of global revenue in the previous financial year, depending on which figure is higher. If Aggregate or a subcontractor engaged by Aggregate were to breach requirements stipulated by GDPR, this could also have a negative impact on its business performance. The realisation of this risk could negatively impact Aggregate's reputation and its net assets, financial position and results of operations.

1.1.2 Risks related to the real estate market

Aggregate is dependent on the development of the real estate market predominantly in Germany, in particular in Berlin, but also with an interest in the broader DACH region (Germany, Austria and Switzerland) and Portugal. The real estate market, in turn, depends on the performance of the overall economy and on the demand for real estate and rental space. Unfavourable macroeconomic developments could adversely affect Aggregate's business and may also result in restricted access to debt and equity financing and potential payment defaults of Aggregate's business partners.

Aggregate's core business is in real estate investments. The Group focuses on acquiring, developing, managing and selling residential and commercial real estate predominantly in Germany, in particular in Berlin, but also with an interest in the broader DACH region (Germany, Austria and Switzerland) and Portugal. The Group's and thus Aggregate's business success is therefore especially dependent on the performance of the real estate markets it operates in, the demand for properties, including rented properties, in Germany and in particular in Berlin as well as Portugal, in particular in Lisbon, Porto and the Algarve region and the level of achievable rents, the expenses necessary to generate the rental income, as well as the achievable purchase and sale prices and market values of properties. The real estate market, in turn, is dependent in particular on the performance of the overall economy, political developments, including changes in legislation, and the demand for real estate in the respective country. Key factors affecting macroeconomic developments in Germany and Portugal include the state of the German and Portuguese economies, as well as European and global economy, the development of commodity prices and inflation rates, the extent of national indebtedness, and interest rates. The current worldwide economic downturn, a rise in the inflation rate, deflationary tendencies or an upturn in interest rates could adversely affect macroeconomic performance. Moreover, the last recession in the Eurozone, particularly the need for some governments to cut back on spending to retain credibility in the financial markets, has impacted economic developments in Germany and – to a more significant degree – Portugal and an increasing level of national indebtedness could have consequences, including reduced economic output, a higher inflation rate, rising taxes, and lower income, thus reducing

the willingness of private individuals and institutional investors to invest. A deflation may have similar effects. The fluctuations in exchange rates, especially the euro-to-dollar rate, could have a material effect on German exports and therefore also on the performance of the German economy as a whole.

In addition, the rapid spread of SARS-CoV-2 (the “**Coronavirus**”), first identified in December 2019, has resulted in a deterioration of the political, socio-economic and financial situation across the globe, including Germany, Portugal and the European Union as a whole. In response to the pandemic, authorities all over the world imposed severe restrictions on public life and businesses which disrupted global supply chains, lowered equity market valuations, created significant volatility and disruption in financial markets, and increased unemployment levels. The extent of the impact of the Coronavirus pandemic on the global economy and the Group’s business remains uncertain at the time of this Offering Memorandum. The extent, duration and magnitude of the Coronavirus pandemic’s effects will depend on future developments, all of which are highly uncertain and difficult to predict, including the impact of the pandemic on global and regional economies, travel, and economic activity, as well as actions taken by governments, business and individuals in response to the pandemic or any future resurgence. However, it is already expected that the gross domestic product (“**GDP**”) in the European Union will drop in 2020 (Source: European Commission). More specifically, the real GDP for Germany is forecasted to drop by 6.25% in 2020 and the GDP for Portugal is forecasted to drop by 9.75% for 2020 (Source: European Commission).

In particular, lockdowns and travel restrictions could have a material adverse effect on the tourism sector in Portugal and the overall productivity of the European Union. Any widespread health crisis, including the Coronavirus and future pandemics, could result in tenants being unable to pay their rents when due or at all, adversely affect the fair value of the Group’s real estate properties and other assets, cause a significant decline of aggregate rent levels in affected areas and, ultimately, affect Aggregate’s ability to access debt and equity capital on attractive terms, or at all. In addition, lockdowns and travel restrictions could result in material layoffs and therefore a rise in unemployment figures and decrease in incomes, which, in turn, could have a material adverse effect on the purchasing power and a lower demand for real estate purchases in the European Union. Furthermore, lockdowns can have an adverse effect on the execution of the Group’s projects and may cause delays in construction work due to, e.g., government mandated work stoppages, social distancing measures, procurement or personnel shortages.

The demand for real estate is driven mostly by demographic developments, interest rate levels, financing conditions, labour market performance, the personal debt levels of potential buyers, consumer confidence, the real income levels of individuals, and foreign investor activity on the real estate market. A population decline could result in shrinking demand for residential space. In addition, demand for office properties may change in terms of location, the size of space required, and services, including as a result of the growth of mobility, and the trend towards working from home which may have been accelerated due to working experience during the Coronavirus pandemic. In addition, a decrease in real income and an increase in unemployment could adversely affect the population’s buying power, and therefore its propensity to acquire residential real estate, or to lease large or high-end residential spaces. An increase in national indebtedness and the unpredictable consequences of the United Kingdom’s decision to leave the EU (“**Brexit**”), an increase in interest rates or a deflation could also lower private and institutional investors’ propensity to invest in real estate.

In Europe, potential future changes to monetary policy, renewed doubts about the future of the Eurozone, political uncertainty arising from populist movements, insufficient deleveraging in the private and public sectors, a halt in implementing structural and financial reforms and an elevated level of political uncertainty could adversely affect the real estate markets as well the Group’s operations. Moreover, since early 2018, the United States announced a series of potential measures relating to international trade. The current administration imposed tariffs on certain products and retaliatory tariffs have been announced by several trading partners of the United States, including the EU and China. These measures and further changes to U.S. trade policy could result in further retaliatory tariffs (so called “trade wars”), which individually or in aggregate may have a material adverse effect on the German economy.

In addition, when granting loans, credit institutions could require stricter eligibility criteria for borrowers. This could lower investors’ propensity to invest in real estate due to the restricted access to or less attractive terms of financing options.

A deterioration in Germany’s and Portugal’s economic performance and falling demand for real estate or rental property in Germany and Portugal, respectively, could negatively affect the Group’s business performance and could have material adverse effects on the Group’s and thus Aggregate’s business, net assets, financial condition and results of operations.

Moreover, there is the risk of an unfavourable development in economic conditions in the European Union driven by instability in the Eurozone, especially due to Brexit but also due to political instability in other countries, such as Spain with regard to Catalonia’s controversial strive for independence. Any such political instability in the Eurozone may result in an unfavourable development of the real estate market in Germany and Portugal and thus indirectly negatively affect Aggregate’s business.

A negative trend in the economic environment could, for example due to the introduction of stricter eligibility criteria for borrowers, also adversely affect Aggregate’s or the Group’s ability to finance its acquisition of real estate portfolios by

debt capital and refinance its existing and future liabilities and could result in a lack of liquidity, operational loss, insolvencies or other developments at Aggregate's and the Group's business partners as a result of which they could no longer be in the position to meet their obligations under the contracts entered into with Aggregate or members of the Group.

The same risks are also applicable to the Financial Real Estate Assets business segment of Aggregate, including Aggregate investments in the ADLER Group and other listed equities, listed bonds, listed funds and short-duration real estate loans always secured by the underlying real estate asset.

The occurrence of any of the aforementioned risks could have material adverse effects on the assets, financial position, and results of operations of the Group and thus Aggregate.

The availability of financing and the competition from other property companies could have a negative impact on the business of the Group.

The development of the property sector is largely determined by the availability of financing. The Group's ability to obtain debt financing, guarantees or derivatives or hedging lines from financial institutions or private lenders at commercially acceptable terms, including volume and costs, could depend on several factors, some of which are beyond the Group's control, such as general economic conditions, the availability of credit from financial institutions, market interest rates and global and EU monetary policy and financial markets regulation. The Group's access to financing and liquidity may also be affected by the Coronavirus pandemic. As a result of increased levels of defaults, banks may have reduced or may in the future reduce liquidity, which could make it harder for the Group to obtain bank financing it may desire for future acquisitions or re-financing purposes. Also, if the capital markets continue to be more volatile as a result of the uncertainties surrounding the Coronavirus pandemic, the Group may face difficulties in accessing the capital markets for new debt or equity financing. Adverse capital market conditions may also lead to increased costs of funding, resulting in an adverse impact on the Group's earnings and cash flows and the Group's ability to refinance maturing liabilities may be limited. Moreover, a persistently restrictive lending policy could negatively affect the demand for real estate in general, and thus result in impairments for the inventory properties of the Group, and in lower proceeds from newly developed properties.

The property sector is characterised by intense competition among numerous providers. Factors such as pricing, product and service quality, development and execution capabilities, financing terms and the ability to quickly adapt to shifts in market demands play an important role in the Group's highly competitive market environment. Therefore, there is the risk that mounting competition will intensify the price pressure and push down margins.

Furthermore, demand for residential properties could also be negatively impacted by the expected decline in the German population and the resulting potential downturn in living space requirements.

The occurrence of any of the aforementioned risks could have material adverse effects on the assets, financial position, and results of operations of the Group and thus Aggregate.

The current economic uncertainty regarding the future of the Eurozone and economic developments in Germany, Portugal and the European Union together with the current favourable low interest rate environment result in comparably high valuations of residential real estate portfolios in Germany and Portugal. Any rise in interest rates could have material adverse effects on the German and Portuguese real estate market and on Aggregate.

The global financial and economic crisis and the slow and uncertain recovery of the global economy have resulted in increased uncertainty regarding future economic developments. In addition, the current economic downturn as a result of the Coronavirus pandemic added further uncertainty to the development of the global economic performance. In particular, national and supranational fiscal stimuli put in place in response to the economic fallout of the Coronavirus pandemic resulted in a steep increase of national indebtedness, which, in turn, increases the already high levels of national indebtedness in the European Union and, in particular, in Portugal. This increased level of national indebtedness may require some governments to cut back on spending to retain credibility in the financial markets and may have an impact on public spending and thus to the economic developments in Germany and Portugal. This uncertain economic outlook has increased demand for investment opportunities that typically provide stable and largely predictable cash flows, including investments for real estate. The low interest rate level in Europe contributes to this trend. As a result, property prices and the value of residential real estate have increased. These developments could reverse themselves if, for example, interest rates were to rise. A rise in interest rates could result from an improvement of the general economic situation, which could lead to greater interest in investments with a higher yield and less interest in real estate investments. Among other consequences, such developments could have an adverse effect on the Group's portfolio optimisation efforts.

In addition, more stringent borrowing requirements could be introduced (including as a result of a deterioration in general economic conditions), which could impair the Group's ability to finance property portfolio acquisitions through debt and its general ability to refinance maturing debts.

The occurrence of any of the aforementioned risks could have material adverse effects on the assets, financial position, and results of operations of the Group and thus Aggregate.

It could become more difficult for the Group to acquire or develop real estate on attractive terms, particularly due to the recent increase in market prices for real estate portfolios, land for development and real estate companies and the increasing consolidation in the residential real estate market, in particular in Germany.

As part of the Group's business, the Group constantly needs to acquire or develop real estate. Such acquisitions or developments may only be implemented, however, if attractive real estate portfolios or land are available for purchase at economically reasonable prices. Given the current high demand for real estate, including in Germany and Portugal, such portfolios and land may be unavailable or available only on unfavourable terms. Due to the increasing consolidation in the German residential real estate market, the number of available real estate portfolios has further decreased in Germany. In addition, competitors with asset acquisition objectives similar to those of the Group may possess greater financial resources and lower costs of capital than Aggregate. Furthermore, it cannot be guaranteed that the Group will be able to generate sufficient funds to finance such envisaged acquisitions of portfolios or land in the future.

Additionally, the supply of real estate portfolios might be limited, for example, due to fewer sales of real estate portfolios by public and private long-term owners. If public long-term owners cease privatising or if they reduce their privatisation activities, supply could be constricted, which could increase competition for acquisitions that would be suitable for the Group and result in the prices of residential properties for example on the German market increasing further. As a consequence of these factors, the Group could be forced to pay higher prices or to acquire fewer (if any) properties.

The occurrence of any of the aforementioned risks could have material adverse effects on the assets, financial position, and results of operations of the Group and thus Aggregate.

1.1.3 Risks related to the Issuer's financial situation

The Group's ability to repay existing debt with loans and other debt instruments could be limited. It may be difficult or expensive to obtain new sources of financing.

As of 31 December 2019, the Group has an unaudited *pro forma* net debt of approximately EUR 1,255.3 million, an unaudited *pro forma* LTV of 35.9% and an unaudited *pro forma* gross current financial debt of approximately EUR 325.8 million. In relation to the existing loans for financing the properties and shares in real estate companies held by the Group, the refinancing of the ongoing business activities, and the new borrowing required to acquire additional properties and stakes in real estate companies, there is a risk that company-specific and market-specific developments may make it harder to borrow funds and/or make such borrowing possible only on less favourable terms.

The line of business currently pursued by the Group is to a large degree influenced by the availability of financing options. A limitation of access to the capital markets or a restrictive lending policy of banks over extended periods of time could negatively impact the business performance and the growth of the Group and thus Aggregate.

The development of real estate is exposed to the risk that a measure may not have been completed at maturity and that a loan rollover or a refinancing on the capital markets is either impossible altogether or possible only on unfavourable terms and/or at increased costs.

As of 31 December 2019, the Group has taken out loans and borrowings in a total outstanding amount of EUR 4,085.1 million that are subject to certain covenants agreed with the banks (financial covenants). Breaches of these covenants could trigger payments into blocked accounts or early repayment obligations on the basis of a contractually agreed escalation procedure.

In the future, Aggregate intends to refinance maturing debt with new bonds, notes and loans (or by extending the maturity of such debt). Aggregate's ability to repay existing financial obligations by raising new debt capital (or by extending the maturity of existing debt) could be limited, for example, as a result of market conditions, its business condition or the level of debt of Aggregate or of other Group companies. Large-volume debt financing could require costly restructuring in order to facilitate a refinancing. Although Aggregate was able to refinance its debt and extend maturities of various financial liabilities in the past, Aggregate might no longer be capable to raise new debt funding in the capital markets or with banks, or may only be able to do so on less favourable financial terms or with the requirement of additional security.

The occurrence of any of the aforementioned risks could have material adverse effects on the assets, financial position, and results of operations of the Group and thus Aggregate.

Goodwill represents a significant portion of Aggregate's total assets, which could be significantly reduced if impairments were to be recognised.

Goodwill represents a significant portion of the Group's total assets, primarily related to Aggregate's stake in VIC. As of 31 December 2019, the *pro forma* intangible assets and goodwill (approximately EUR 801 million based on 68% ownership of VIC) amounted to approximately EUR 804.4 million and the *pro forma* total assets amounted to approximately 3,606.8 million. Impairment losses may result from, among other things, deterioration in performance, adverse market conditions,

adverse changes in applicable laws or regulations and a variety of other factors. An impairment loss is the amount by which the carrying amount of an asset exceeds its recoverable amount which is the higher of the fair value less cost of disposal or value in use. Any of these factors may cause an impairment of goodwill. The amount of any quantified impairment must be expensed immediately as a charge to the Group's results of operations. Depending on future circumstances, it is, therefore, possible that the Group may never realise the full value of its goodwill. Any determination of impairment of goodwill could have a material adverse effects on the business, financial condition and results of operations of the Group.

Future acquisitions may not close as originally contemplated or at all, for example, due to conditions in the purchase agreement or a failure to reach final agreements on acquisition financing.

In planned acquisitions of real estate, unforeseen problems could arise. For example, some of these transactions may be subject to a number of closing conditions and certain rights of withdrawal for both parties may be agreed upon. If certain conditions precedent set out in the investment agreement are not fulfilled entered into, such transactions might not occur in the form and/or within the timeframe originally contemplated.

In the event of a failure of any planned acquisitions, the Group would have to bear the associated transaction costs without receiving any of the intended results and benefits from the envisaged acquisition. The materialisation of this risk could have material adverse effects on the business, financial condition, cash flow and results of operations of the Group.

Aggregate's variable rate indebtedness subjects it to interest rate risk, which could cause Aggregate's debt service obligations to increase significantly.

Fluctuations in interest rates may affect Aggregate's interest on existing debt and the cost of new financing. As of 31 December 2019, the Group has taken out loans and borrowings in a total outstanding amount of EUR 4,085.1 million and 64.42% of its notional indebtedness is subject to variable interest rates and unhedged. If interest rates were to increase, Aggregate's debt service obligations on its variable rate indebtedness would increase even though the amount borrowed remains the same, which would require Aggregate to use more of its available cash to service its indebtedness. If interest rates increase significantly, Aggregate could be unable to service its indebtedness, which would exacerbate the risks associated with its leveraged capital structure. This could, in turn, have a material adverse effect on the business, financial condition, results of operations and cash flows of Aggregate.

VIC Properties S.A. has issued convertible bonds which investors may convert into shares of VIC Properties S.A. upon VIC Properties going public. If investors do not convert the convertible bonds into shares of VIC Properties S.A. but instead demand repayment at maturity, VIC Properties S.A. might be forced to secure financing under economically unattractive conditions to refinance such repayment of the convertible bond.

On 26 April 2019, VIC Properties S.A. successfully completed an offering of secured pre-IPO convertible bonds with a nominal amount of EUR 250 million. The convertible bonds were issued at an issue price of 90% of their principal amount and will be redeemed at 105% of their principal amount (the "**Redemption Amount**") on the maturity date. The convertible bonds will mature on 28 May 2025 if not previously purchased, redeemed or converted. The bondholders of such convertible bonds may convert the convertible bonds into shares of VIC Properties S.A. It is expected that the majority of bondholders will use their conversion right, which would dilute Aggregate's stake in VIC Properties S.A. However, if the bondholders do not convert the convertible bonds prior to 25 May 2025 but instead demand repayment at the Redemption Amount, VIC Properties S.A. might be forced to secure refinancing under economically unattractive conditions to refinance such repayment of the convertible bond.

The occurrence of any of the aforementioned risks could have material adverse effects on the assets, financial position, and results of operations of the Group and Aggregate.

The Group expects to incur additional indebtedness in the future.

The indebtedness that the Group may incur in the future, even within the limits set forth in Aggregate's business strategy, could reduce its financial flexibility. The Group typically seeks external funding, including bank debt, for the acquisition and financing of real estate properties, project developments and other real estate assets. If certain events occur, including a breach of financial covenants, the borrowing arrangements of the Group may become payable prior to their scheduled repayment date or may otherwise be subject to early termination. If the Group is required to repay borrowed amounts early, members of the Group may be required to sell assets in order to service the payments, which the Group would not otherwise choose to sell, potentially at prices that are lower than expected. Additionally, the relevant members of the Group may be subject to prepayment penalties.

The Group may also find it difficult or costly to refinance indebtedness as it matures, and if interest rates are higher when refinancing the indebtedness, its financing costs could increase. Further, Aggregate may pledge its interest in one or more of its subsidiaries or other financial assets it may hold as collateral for financings from time to time. Additionally, the Group is subject to the risk that the fair value or future cash flows of financial instruments fluctuates due to changes in interest rates which in turn may increase financing costs of the Group. The ability to pay and refinance debt is significantly

reliant on the future operating performance of the Group and its ability to generate a sufficient cash flow. The Group may be unable to achieve any refinancing on a timely basis or on satisfactory terms and may also be limited in its ability to pursue refinancing alternatives by the terms and conditions of its existing debt arrangements. The inability of the Group to refinance its debt obligations on or prior to their maturity on favourable terms or at all could have a material adverse effect on the ability to service and repay the Notes.

Any change to the indebtedness of the Group could have a material adverse effect on its business, financial condition and results of operations.

The Issuer's cash flows and possible future interest payments are dependent on the annual profit and profitability of its subsidiaries and the ability to receive cash from subsidiaries or must be augmented by borrowed capital or the sale of Financial Real Estate Assets.

The Issuer is a holding company and does not conduct its operating business itself but does so through its subsidiaries. To cover the Issuer's operating costs, it relies on, among other things, distributions that it receives from its subsidiaries and other investment interests or, as the case may be, scheduled repayments of loans it has granted to its subsidiaries. The distributions by its subsidiaries depend, in-turn, on the subsidiaries' operating results and their ability to make those distributions under applicable law and potential restrictions of existing and future loan contracts, including the consent of banks to the distribution of surplus cash or the repayment of shareholder loans. Aggregate's two main operative subsidiaries, Quartier Heidestrasse GmbH and VIC, are in the development phase for their respective investments. Quartier Heidestrasse GmbH is not expected to be able to make distributions or other upstream payments to Aggregate in at least the short-term. In addition, any such distributions or payments may be restricted by the terms of their respective financing arrangements. For example, VIC is restricted from making dividend payment to Aggregate. Therefore, Aggregate is dependent on cash flow from its Financial Real Estate Assets or other sources to service its own indebtedness, including the Notes. Such funds, and the ability to source cash from subsidiaries, may not be sufficient in the future to satisfy all of its payment obligations. If the funds are insufficient, the Issuer would need to obtain additional funds to meet its payment obligations, including under the Notes.

Negative developments in connection with any such factors or at the level of each subsidiary, including any impairment of the ability by such subsidiary to make distributions of cash to the Issuer, could force it to sell properties or Financial Real Estate Assets or borrow money on unfavourable terms. The subsidiaries of the Issuer will most likely refrain from paying dividends if available cash is insufficient for the payment thereof. However, any decision to borrow money to facilitate paying dividends could, while in the short-term potentially strengthen the Issuer's position among shareholders, result in increased financial obligations over the long run.

The Pro Forma Financial Information of the Group is only provided for illustrative purposes and is no indicator for the future business-, asset-, financial- and earnings situation of the Group.

The unaudited *pro forma* consolidated financial information of the Group included in this Offering Memorandum (the "**Pro Forma Financial Information**") are only provided for illustrative purposes. It should not be considered as an indicator for the future business-, asset-, financial- and earnings situation of the Group.

The Pro Forma Financial Information are based on historic consolidated financial statements of the Group and, *inter alia*, on the historic consolidated financial statements of Aggregate and Consus Real Estate, subject to certain adjustments, assumptions and estimates. These adjustments, assumptions and estimates are preliminary and based on information that was available during the time of preparation of the Pro Forma Financial Information and which has not been reviewed or audited by the Issuer's independent auditors. In particular, the methodology for valuing the ADLER Group shares is preliminary and has not yet been reviewed by the Issuer's independent auditors. As such, it cannot be excluded that, based on the discussions with the Issuer's review auditor at year end, it will be concluded that a different methodology for the valuation of the ADLER Group shares than the one used for the purposes of the Pro Forma Financial Information will be applied.

Further, for the preparation of the Pro Forma Financial Information only the effects of the de-consolidation of Consus Real Estate and the recognition of the Group's stake in the ADLER Group were taken into account and no other effects (including the issuance of the Original Notes and the use of proceeds therefrom) were considered. For more details regarding the other events and transactions that are not reflected in the Pro Forma Financial Information, please see note 30 to the Issuer's audited consolidated financial statements as of and for the year ended 31 December 2019. As a result thereof, it must be assumed that the actual prospective business-, asset-, financial- and earnings situation of the Group will differ significantly from the Pro Forma Financial Information. In addition, the assumptions made during the preparation of the Pro Forma Financial Information could prove incorrect or inaccurate and other factors could significantly negatively affect the prospective business-, asset-, financial- and earnings situation as well as the cash flows and prospects of the Group.

1.1.4 Legal and regulatory risks

Legal and regulatory conditions in the real estate industry could change and adversely affect Aggregate's business.

Aggregate's business is influenced by the legal and regulatory conditions applicable to real estate, in particular in Germany and Portugal and to the sale of land. Adverse changes in the applicable laws or administrative provisions or changes in their interpretation or application may have negative effects on Aggregate, the Group and/or its investments. In particular, it cannot be excluded that any changes in tax treaties, tax legislation, administrative practice or jurisprudence, which may occur at any time at short notice, result in negative tax effects for the Group and thus Aggregate.

In particular, an increase in the real estate transfer tax or property tax, changes in capital gains taxation, limitations on tax deductions, or stricter add-back rules for interest expenses could adversely affect the Issuer or any of its present or future subsidiaries. Despite the general principle of non-retroactivity in Germany, any changes in applicable laws, regulations and directives may have a retroactive effect. There have been significant changes in the legal and tax environment in Germany in past years. For example, the German real estate transfer tax ("RETT") has undergone significant changes, the RETT rate has increased from 3.5% to up to 6.5% in some German states and the assessment basis for RETT incurred because of share sales is now similar to the fair market value of the real estate asset. The Issuer cannot rule out that further increases of the tax rate might take place in the future.

Moreover, German residential landlord tenant law (*Wohnraummietrecht*) is considered to be tenant friendly in many respects, including limits on the amount of rent chargeable. The rent control (*Mietpreisbremse*) stipulates that the rent may not exceed the local comparative rent by a maximum of 10% in case of new lettings of residential units in areas designated as a tight residential rental market. However, the rent control only applies if the federal states have implemented ordinances designating areas as tight residential rental market. As of the date of this Offering Memorandum, the rent control entered into force in 13 of the 16 German Federal States but may enter into force in additional German Federal States. There are certain exceptions to the rent control limitation, for example, the first letting of new or fully modernized buildings are excluded from the rent limitation. An abolition of such exclusion from the rent limitation could have a material adverse effect on business, financial condition and results of operations of Aggregate and/or its investments, as the purchase price may need to be adjusted.

In particular, changes in the legal rights of tenants and the protection of tenants against termination could curtail the Issuer's flexibility in changing the tenant structure of its portfolio and negatively affect the overall value of the leased properties. Stricter environmental laws and regulations, especially energy conservation regulations, could increase the Issuer's costs associated with the management of its residential property portfolio and expand its liability.

Tax benefits or regulatory rules concerning investments in real estate companies could be changed, which could dampen general interest in real estate in Germany and Portugal. In particular, this could result in reduced proceeds from the sale of parts of the residential property portfolio.

The legal environment might further be negatively influenced by political developments such as current campaigns for expropriation or nationalisation of real estate property and rental caps with the goal to supply more affordable housing. For example, in June 2019, Berlin's municipal government announced its intention to freeze rents in Berlin for the next five years, which is to take retroactive effect from 18 June 2019. The so-called "Mietendeckel" was passed on 30 January 2020 by Berlin's parliament (*Berliner Abgeordnetenhaus*) and entered into force on 23 February 2020. While lettings in buildings, which were completed after 1 January 2014, are exempt from the law, it may adversely affect the business of Aggregate by potentially impacting the demand for apartments. As a result of these legislative plans and discussions, demand for the real estate properties may decrease, especially if other municipal or state governments introduce similar laws or announce plans to introduce such laws.

Any unfavourable developments in the legal and regulatory environment and the occurrence of any of the aforementioned risks could have material adverse effects on the assets, financial position, and results of operations of the Group and thus Aggregate.

The structure of the Group is mainly influenced by the general tax environment in Luxembourg, Germany and Portugal and changes in the tax environment may increase the Group's tax burden.

In addition to Aggregate, which is established in Luxembourg, the Group includes companies in other European jurisdictions and is invested in other real estate companies in Europe, such as Germany. The Group has registered offices in Germany, Luxembourg, Portugal and other countries (Cyprus, the United Kingdom, Ireland and the Isle of Man). The Group's companies are subject to the tax laws of their jurisdictions of registration and the jurisdictions where they conduct business. The cross-border participation of Aggregate in its subsidiaries or in other real estate companies, which are not subsidiaries, provides for various tax aspects, including cross-border taxation issues governed by directives of the European Union and/or double-tax treaties between Luxembourg and the jurisdictions of the subsidiaries or other real estate companies the Group is invested in. It cannot be excluded that tax authorities in the countries in which the Group is active

may not share the view of the Group's tax assessment, which could lead to additional tax burdens for the Group in any of these countries.

The Group is predominantly subject to the tax environment in Luxembourg, Germany and Portugal. The Group's tax burden may increase as a consequence of current or future tax assessments, tax audits or court proceedings based on changes in tax laws or changes in the application or interpretation thereof.

The Group is predominantly subject to the tax environment in Luxembourg, Germany and Portugal. Accordingly, the Group's tax burden primarily depends on various aspects of tax laws, as well as their application and interpretation. Amendments to tax laws may have a retroactive effect, and the application or interpretation of tax laws by tax authorities or courts may change. Furthermore, court decisions are occasionally limited to their specific facts by tax authorities. Any of these developments may increase or alter the Group's tax burden.

A number of factors may also impact the Group's tax situation. The Group is required to file tax declarations *inter alia* in Luxembourg, Portugal and Germany, from time to time, and any tax assessments that deviate from the Group's tax declarations may increase or alter the Group's tax obligations. The individual entities of the Group are regularly subject to tax audits by the competent tax authorities which may result in increases in the Group's tax obligations or penalties and fines. The Group may also be subject to administrative or judicial proceedings with respect to its tax declarations, and may incur substantial time and effort in addressing and resolving tax issues.

In addition, changes in tax treaties, tax legislation, administrative practice or case law, which are possible at any time and may occur on short notice, could have adverse tax consequences for the Group. The applicable tax rates, for example with respect to property tax, property transfer tax or capital gains tax, may also change rapidly and with short notice. Changes in real estate transfer tax may also negatively affect the value of Aggregate's portfolio. Additionally, changes could be made to the ability to depreciate owned real estate. Additionally, divergent statutory interpretations by the tax authorities or the courts are possible.

In addition, based on its decision on 10 April 2018, the German Constitutional Court (*Bundesverfassungsgericht*) ruled that certain real estate tax provisions (*Grundsteuer*) are unconstitutional and must have been amended by 31 December 2019. The legislative amendment process has been passed on 26 November 2019 and the changes will become effective on 1 January 2025. Based on the amended provisions the calculation of the real estate tax (*Grundsteuer*) will change, and, accordingly, the real estate tax may increase. Moreover, there are discussions whether to prohibit the indirect transfer or on-charging of the real estate tax to the tenants. It is currently generally accepted practice to allocate the real estate tax to the tenants on the basis of respective provisions in the rental agreements with the effect that the real estate tax is effectively borne by the tenants. Consequently, the return for the lessor could decrease unless the base rent could be increased by the real estate tax cost. The reform of the real estate tax (*Grundsteuer*) provisions may lead to higher real estate taxes (*Grundsteuer*) in metropolitan areas and may accordingly affect the Group's business.

There can be no assurance that the provisions for tax risks Aggregate and/or the Group made will be sufficient to cover the tax payment obligation resulting from any tax audit in the future. Any obligation to pay additional taxes could have a material adverse effect on the Group's business, financial condition, cash flow and results of operations and thus Aggregate.

Several initiatives are currently being considered at both the national level and the level of the EU that could ultimately affect the taxation of companies in such jurisdictions. The initiatives relate, among others, to changes to the limitation of interest deductions (e.g., in connection with hybrid financial instruments) and the establishment of a common consolidated corporate income tax base. These or any other proposals could have disadvantageous effects on the Group's future tax burden. Therefore, if the aforementioned initiatives, or any other changes in the law, were implemented, any one of them could have a material adverse effect on the Group's business, financial condition, cash flow and results of operations and thus Aggregate.

Amendments to applicable laws, administrative practice and changes in the interpretation of any of the aforementioned may also have a retroactive effect. Any such development could have a material adverse effect on the attractiveness of the acquisition of real estate properties and therefore may have negative effects on the Group's real estate development and sales activities.

If such changes in the legal or tax framework occurred, in particular in relation to a tightening of legislation governing real estate transfer taxes, either individually or in combination, or if any other changes in the legal or tax framework were to occur, any of these could have a material adverse effect on the Group's business, financial condition and results of operations and thus on Aggregate.

The Group is exposed to real estate transfer taxes (RETT).

Increases in the applicable RETT rates for the properties in the Group's portfolio could negatively impact the portfolio by, among other things, reducing the value of and the proceeds from a sale of the affected properties or by reducing purchase demand for the affected properties or by reducing the valuation of the affected properties in the portfolio.

The Group currently holds real estate in Germany and shares in companies which own real estate in Germany. Under current German law, the transfer of real estate or of a 95% or greater interest in a company that owns real estate triggers a potential liability for RETT.

Because of the complexity of the RETT laws in Germany, the Group may from time to time seek to acquire properties with less than a 95% stake in the ownership company. This may result in an increased complexity of the transaction and stronger minority rights of the associate parties. As a consequence, transaction costs and future administrative expenses for the newly acquired property would generally rise, too. Recently proposed changes to German RETT laws aim to tighten the statutory RETT framework with regard to share deals. Accordingly, share deals that do not trigger any RETT may no longer be possible in the future or such acquisitions might be more difficult. In broad terms these proposals are to (i) extend the stricter partnership RETT rules to incorporated companies; (ii) reduce the economic ownership threshold upon which RETT is triggered from 95% of the shares or interest in a property company, as it is currently, to 90%; and (iii) extend the 5 year cooling period to 10 years, respectively 15 years in certain situations. As a result, RETT will be payable unless the seller retains over 10% of the shares or interest in a property company for at least 10 (15) years. While the draft bill originally stipulated that the respective legislative changes shall come into force in January 2020, the political parties currently forming the German government announced in October 2019 that the intended changes to RETT will not come into force as of 1 January 2020 as originally planned. Instead, the coalition parties intended to resolve the draft in the first half of 2020; discussions are, however, still ongoing and the actual timing of a new draft is unclear. It is, furthermore, unclear if and to which extent such changes will enter into force with retroactive effect.

Any increase in applicable RETT rates for the properties in the Group's portfolio could have a material adverse effect on the Group's business, net assets, financial condition, results of operations, cash flows and prospects and thus on Aggregate.

The Group and the external sales partners could face compensation claims from third parties in connection with the consultancy services rendered by demand.

When selling individual apartments, the Group and their external sales partners also perform consultancy services. In connection with rendering such services, liability of the Group could arise in case these services are rendered inadequately and lead to damages of third parties. This could lead to compensation claims from third parties.

Due to restrictions on the deduction of interest expenses and the forfeiture of interest carry forwards under German tax laws, Aggregate may be unable to fully deduct interest expense from its financial liabilities.

Aggregate has entered into numerous financing transactions with third parties in the past and will continue to do so in the future. In the course of these arrangements, Aggregate is obliged to pay principal and interest. However, different tax rules in Germany restrict the tax deductibility of interest expenses for corporate income and trade tax purposes. For instance, through the Company Tax Reform (*Unternehmenssteuerreform*) in 2008, Germany abolished its former regulation of shareholder debt financing and introduced the so called "interest deduction ceiling" (*Zinsschranke*) which imposes certain restrictions on the deductibility of interest expenses for tax purposes (section 4h of the German Income Tax Act (*Einkommensteuergesetz*) in conjunction with section 8a of the German Corporate Tax Act (*Körperschaftsteuergesetz*)).

Due to the interest deduction ceiling, the deductibility of net interest expenses is generally limited to 30% of taxable EBITDA (taxable income adjusted for interest expense and certain types of depreciation) in any given year, unless certain exceptions apply.

For example, interest expense is fully deductible if (a) the interest expense exceeding a business' interest income is less than EUR 3 million (*de minimis* rule); (b) the business in question does not belong to a group, i.e., it does not have to be consolidated with other businesses (so called "stand alone clause"); or (c) the equity ratio test is met, i.e., the equity ratio of the business in question is no more than a maximum of two percentage points lower than the equity ratio of the consolidated group (so called "escape clause"). Any amount of interest expense which exceeds the 30% threshold and, therefore, is non-deductible, can only be carried forward to future periods and may be deductible in future financial years under certain circumstances. An interest carry forward may be forfeited in part or in full in connection with certain measures, for instance, a change of the ownership structure.

In the event that Aggregate's interest expense is non-deductible or only partially deductible due to the interest deduction ceiling or if any risk related to a potential forfeiture of loss and/or interest carry forwards under German tax laws materialize, the occurrence of any of these events could have a material adverse effect on the business, financial conditions and results of operations of Aggregate.

1.2 RISKS RELATING TO THE TRANCHE 3 NOTES

An investment in the Tranche 3 Notes involves certain risks associated with the characteristics, specification and type of the Notes which could lead to substantial losses that Holders would have to bear in the case of selling their Notes or with regard to receiving interest payments and repayment of principal. Risks regarding the Notes comprise, *inter alia*, the following risks:

1.2.1 Risks related to the nature and the terms and conditions of the Notes

Risk of a partial or total failure of the Issuer to make interest and/or redemption payments

Any person who purchases the Notes is relying on the creditworthiness of the Issuer and has no rights against any other person. Holders are subject to the risk of a partial or total failure of the Issuer to make interest and/or redemption payments that the Issuer is obliged to make under the Notes. The worse the creditworthiness of the Issuer (see also “1.1. Risks relating to the Issuer and the Group” above), the higher the risk of loss resulting from an investment in the Notes.

The specific risk is that if a credit risk (for example, because of the materialisation of any of the risks regarding the Issuer and/or the Group) realises this may result in partial or total failure of the Issuer to make interest and/or redemption payments under the Notes which in turn may result in a Holder’s loss of the investment in the Notes.

The Notes may not be a suitable investment for all investors.

Each potential investor in the Notes must determine the suitability of its investment in light of its own circumstances. In particular, each potential investor should:

- have sufficient knowledge and experience to make a meaningful evaluation of the relevant Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in this Offering Memorandum;
- have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation and the investment(s) it is considering, an investment in the Notes and the impact the investment in the Notes will have on its overall investment portfolio;
- have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including where the currency for principal or interest payments is different from the potential investor’s currency;
- understand thoroughly the terms of the Notes and be familiar with the financial markets;
- know that it may not be possible to dispose of the Notes for a substantial period of time, if at all, before maturity; and
- be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

The investment activities of certain investors are subject to investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers prior to investing in the Notes to determine whether and to what extent (i) the Notes are permitted investments for it, (ii) where relevant, the Notes can be used as collateral for various types of borrowing, and (iii) other restrictions apply to its purchase or pledge of any Notes. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of the Notes under any applicable risk-based capital or similar rules. Each investor should also consider the tax consequences of investing in the Notes and consult its own tax advisers with respect to the acquisition, sale and redemption of the Notes in light of its personal situation.

The specific risk is that if an investment in the Notes turns out to be not a suitable investment for such investor due to the factors set out above, such investor may suffer a substantial loss which may negatively impact its overall investment strategy.

The Notes bear specific risks typical for fixed rate notes.

The Notes are fixed rate notes. Therefore, each Holder is particularly exposed to the risk that the price of the Notes falls as a result of changes in market interest rates. While the nominal interest rate of the Notes as specified in the Terms and Conditions is fixed during the term of the Notes, the current market interest rates typically change on a daily basis. As the market interest rates change, the price of fixed rate notes also changes, but in the opposite direction. If the market interest rate increases, the price of fixed rate notes typically decreases, until the yield of such notes is approximately equal to the market interest rate of comparable issues.

The specific risk is that if Holders are forced to sell their Notes at relevant trading prices such prices may be lower than the amount invested in the Notes which in turn may result in a Holder’s loss of the investment in the Notes.

The Notes are subject to exchange rate risks.

The Issuer will pay principal and interest on the Notes in Euros. This presents certain risks relating to currency conversions if an investor’s financial activities are denominated principally in a currency or currency unit (the “Investor’s Currency”)

other than Euros. These include the risk that exchange rates may change significantly (including changes due to devaluation of the Euro or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to the Euro would decrease (i) the Investor's Currency-equivalent yield on the Notes, (ii) the Investor's Currency equivalent value of the principal payable on the Notes and (iii) the Investor's Currency-equivalent market value of the Notes. Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate.

The specific risk is that as a result of any of the risks described in this sub-paragraph, investors may receive less interest or principal than expected, or no interest or principal which in turn may result in a Holder's loss of the investment in the Notes.

The Notes are subject to inflation risks.

The inflation risk is the risk of future money depreciation. The real yield from an investment is reduced by inflation. The higher the rate of inflation, the lower the real yield on a Note. If the inflation rate is equal to or higher than the nominal yield, the real yield is zero or even negative.

The specific risk is that if the inflation rate increases during the term of the investment or is higher when the Notes are redeemed compared to the point of time of the investment, investors will suffer a lower yield of the investment in the Notes than expected when investing in the Notes which in turn may result in a Holder's loss of the investment in the Notes.

The Notes are subject to a risk of early redemption.

The Notes are subject to a risk of early redemption. The Issuer may, at its option, and in accordance with the Terms and Conditions, redeem the Notes for reasons of a minimum outstanding principal amount.

The specific risk is that if the Issuer redeems the Notes prior to the final maturity date of the Notes a Holder is exposed to the risk that due to such early redemption its investment will have a lower than expected yield at the point of time when investing in the Notes. Also, in case of an early redemption of the Notes, a Holder may only be able to reinvest on less favourable conditions as compared to the original investment which may result in a lower yield than expected when investing in the Notes.

The Notes will not be legally but economically subordinated to the Group's debt to the extent such debt is secured.

The Terms & Conditions do not require the Issuer to secure the Notes if it provides security for any other indebtedness (including other bonds or capital market indebtedness). To the extent the Issuer provides security interest over its assets for the benefit of other debt without also securing the Notes, the Notes will be effectively junior to such debt to the extent of such assets. Consequently, holders of (present or future) secured debt of the Group may recover disproportionately more on their claims than the Holders in an insolvency, bankruptcy or similar proceeding. The Issuer may not have sufficient assets remaining to make payments under the Notes.

The Notes will be structurally subordinated to all liabilities of the Issuer's subsidiaries.

None of the Issuer's subsidiaries will guarantee the Notes. Accordingly, the Issuer's subsidiaries do not have any obligation to pay amounts due under the Notes or to make funds available for that purpose. Generally, claims of creditors of a subsidiary, including trade creditors and preference shareholders (if any), will have priority with respect to the assets and earnings of the subsidiary over the claims of creditors of its parent entity, including claims by Holders under the Notes. In the event of any foreclosure, dissolution, winding-up, liquidation, reorganisation, administration or other bankruptcy or insolvency proceeding of any of the Issuer's subsidiaries, holders of their indebtedness and their trade creditors will generally be entitled to payment of their claims from the assets of those subsidiaries before any assets are made available for distribution to its parent entity. As such, the Notes will be structurally subordinated to the creditors (including trade creditors) and preference shareholders (if any) of Aggregate's subsidiaries. In addition, the Terms and Conditions as well as the Group's other indebtedness allow the Issuer's subsidiaries to incur additional debt in the future, which will be structurally senior to the Notes.

Under the Terms and Conditions, the Group is permitted to incur substantial additional debt or take other action that could negatively impact the Holders.

The Terms and Conditions restrict the Group's ability to incur additional indebtedness by requiring the maintenance of a loan-to-value ratio. In addition, the Terms and Conditions permit Holders to require the Issuer to redeem or, at the Issuer's option, repurchase the Notes upon the occurrence of a change of control event. However, these restrictions and undertakings may nonetheless allow the Issuer and its subsidiaries to incur significant additional (secured or unsecured) indebtedness, to grant additional security for the benefit of existing and future indebtedness and to enter into transactions, including

reorganisations, mergers, acquisitions and other similar corporate transactions that may adversely affect the Holders. Consequently, the Issuer may not have sufficient assets to make payments on the Notes.

Although the occurrence of specific change of control events will permit the Holders to require redemption of the Notes, the Issuer may not be able to redeem such Notes.

Upon the occurrence of a specific change of control event pursuant to the Terms and Conditions, Holders will have the right to require redemption of the Notes at 101 per cent. of their principal amount, plus accrued and unpaid interest. The Issuer's ability to redeem the Notes upon such a change of control event will be limited by its access to funds at the time of the redemption. Upon a change of control event, the Issuer may be required to immediately repay the outstanding principal, any accrued interest on and any other amounts owed by it under other debt outstanding. The source of funds for these repayments would be the available cash or cash generated from other sources. However, there can be no assurance that there will be sufficient funds available upon a change of control event to make these repayments and any required redemption of the Notes.

The specific risk is that if the Issuer is not able to fund such early redemption due to a change of control event Holders may suffer a loss of their investment.

The Terms and Conditions, including the terms of payment of principal and interest, can be amended by a Holders' resolution and any such resolution will be binding for all Holders. Any such resolution may effectively be passed with the consent of less than a majority of the aggregate principal amount of the Notes outstanding.

According to the Terms and Conditions and the German Act on Issues of Debt Securities of 2009, Holders can, by resolution, consent to amendments of the Terms and Conditions of such Notes. Accordingly, although no obligation to make any payment or render any other performance may be imposed on any Holder, the Holders may, by resolution, materially change the substance of the Terms and Conditions, in particular in the case of Section 5 paragraph 3 numbers 1 through 9 of the German Act on Issues of Debt Securities. Under the German Act on Issues of Debt Securities and the Terms and Conditions of Notes, such amendments require a resolution of Holders holding in the aggregate at least 75 per cent. of the votes cast in respect of the Notes. In connection with any such amendment or waiver, holders of the Tranche 3 Notes will vote as a single class with the holders of the Original Notes. Subject to contestation in court, any such resolution will be binding on all Holders.

The voting process under the Terms and Conditions will be governed in accordance with the German Act on Issues of Debt Securities, pursuant to which the required participation of Holder votes (quorum) is principally set at 50 per cent. of the aggregate principal amount of outstanding Notes (including the Original Notes) at the time of the first Holders' meeting or a vote without meeting. If the quorum is not met for the first voting process, there is no minimum quorum for the second voting process in relation to the same resolution (unless the resolution to be passed requires a qualified majority, in which case Holders representing at least 25 per cent. of outstanding Notes by principal amount must participate in the meeting). As the relevant majority for Holders' resolutions is generally based on votes cast, rather than on principal amount of Notes outstanding, the aggregate principal amount of Notes required to vote in favour of an amendment will vary based on the Holders' votes participating.

The specific risk is that Holders are being outvoted and losing rights towards the Issuer against its will in the event that Holders holding a sufficient aggregate principal amount of the Notes participate in the vote and agree to amend the Terms and Conditions of Notes by majority vote in accordance with the Terms and Conditions and the German Act on Issues of Debt Securities which in turn may result in a Holder's loss of the investment in the Notes. Any such majority resolution will even be binding on Holders, who have declared their claims arising from the Notes due and payable based on the occurrence of an event of default, but who have not received payment from the Issuer prior to the amendment taking effect.

Since no Holders' Representative will be appointed as from the issue date of Notes, it will be more difficult for Holders to take collective action with respect to the Notes.

Under the German Act on Issues of Debt Securities, an initial joint representative (*gemeinsamer Vertreter*) of the Holders (the "**Holders' Representative**") may be appointed by way of the terms and conditions of an issue. The Holders' Representative is not a trustee and its functions differ in material respects from those of a trustee appointed under the U.S. Trust Indenture Act of 1939 or similar legislation. No initial Holders' Representative will be appointed under the Terms and Conditions. Any appointment of a Holders' Representative for the Notes post issuance of the Notes will, therefore, require a majority resolution of the Holders.

The specific risk is that if the appointment of a Holders' Representative is delayed, this will make it more difficult or even impossible for Holders to take collective action to enforce their rights under the Notes.

It is possible that a Holder may be deprived in its individual right to pursue and enforce its rights under the Terms and Conditions if such right was passed on a Holders' Representative.

If a Holders' Representative will be appointed by majority decision of the Holders it is possible that a Holder may be deprived of its individual right to pursue and enforce its rights under the Terms and Conditions against the Issuer, if such right was passed to the Holders' Representative by majority vote who is then exclusively responsible to claim and enforce the rights of all the Holders.

The specific risk is that Holders may not be able to enforce their rights under the Notes individually but with consent and depending on the action of a Holders' Representative only which in turn may result in a Holder's loss of the investment in the Notes.

If a loan is used to finance the acquisition of the Notes, the loan may significantly increase the risk of a loss.

If a loan is used to finance the acquisition of Notes by a potential investor and the Notes subsequently default, or if the trading price diminishes significantly, the investor may not only have to face a potential loss on its investment, but will also have to repay the loan and pay interest thereon.

A loan may significantly increase the risk of a loss. Potential investors should not assume that they will be able to repay the loan or pay interest thereon from the profits of an investment in the Notes. Instead, potential investors should assess their financial situation prior to an investment in the Notes, as to whether they are able to pay interest on the loan, repay the loan on demand, and the possibility that they may suffer losses instead of realizing gains.

The specific risk is that if Holders are not in a position to repay the loan Holders will suffer a substantial loss in the context of investing in the Notes.

The Notes are subject to transaction costs and charges.

When Notes are purchased or sold, several types of incidental costs (including transaction fees and commissions) are incurred in addition to the purchase or sale price of the Notes. These incidental costs may significantly reduce or eliminate any profit from holding the Notes. Credit institutions, as a rule, charge commissions which are either fixed minimum commissions or pro-rata commissions, depending on the order value. To the extent that additional – domestic or foreign – parties are involved in the execution of an order, including, but not limited to, domestic dealers or brokers in foreign markets, Holders may also be charged for the brokerage fees, commissions and other fees and expenses of such parties (third party costs). In addition to such costs directly related to the purchase of securities (direct costs), potential investors must also take into account any follow-up costs (such as custody fees).

The specific risk is that such additional costs may lower the yield of the investment substantially and in a worst case investors may even suffer a loss. Therefore, potential investors should inform themselves about any additional costs incurred in connection with the purchase, custody or sale of the Notes before investing in the Notes.

No assurance can be given as to the impact of any possible judicial decision or change of laws or administrative practices after the date of this Offering Memorandum.

The Terms and Conditions are based on the laws of Germany in effect as at the date of this Offering Memorandum. No assurance can be given as to the impact of any possible judicial decision or change to the laws of Germany or administrative practice or the official application or interpretation of German law after the date of this Offering Memorandum.

The specific risk is that Holders may face detrimental changes in German law which negatively impact their rights under the Notes. This could even lead to situations where Holders are not allowed to enforce their rights under the Notes which in turn may result in a Holder's loss of the investment in the Notes.

The interests of the Issuer's shareholder may be inconsistent with the interests of the Holders of the Notes.

The Group is indirectly wholly owned by Mr. Günther Walcher. The interests of the Issuer's shareholder could conflict with the interests of the Holders of the Notes, particularly if the Group encounters financial difficulties or become unable to pay its debts when due. The Issuer's shareholder could also have an interest in pursuing acquisitions, divestitures, financings, dividend distributions or other transactions that, in its judgment, could enhance its equity investments, although such transactions might involve risks to the Holders of the Notes. Finally, the direct and indirect shareholder of the Issuer may have strategic objectives or business interests that could conflict with the Group's own strategies or interests. If the interests of the Issuer's shareholder conflicts with the Group's interests or the interests of the Holders of the Notes, or if the Issuer's shareholder engages in activities or pursues strategic objectives that conflict with the interests of the Group or the interest of the Holders of the Notes, the Group and the Holders could be disadvantaged.

1.2.2 Risks related to the admission of the securities to trading

The trading price of the Notes could decrease if the creditworthiness of the Issuer worsens or is perceived to worsen.

If, for example, because of the materialisation of any of the risks regarding the Issuer, the Issuer is less likely to be in a position to fully perform all of its obligations under the Notes when they fall due, the market value of the Notes will suffer. In addition, even if the Issuer is not actually less likely to be in a position to fully perform all of the obligations under the Notes when they fall due, market participants could nevertheless have a different perception. In addition, the market participants' estimation of the creditworthiness of corporate debtors in general or debtors operating in the same business areas as the Issuer could adversely change.

The specific risk is that if any of these risks occur, third parties would only be willing to purchase Notes at a substantial discount than before the materialisation of the relevant risk which in turn may result in a Holder's loss of the investment in the Notes.

The Notes do not have an established trading market and an active trading market for the Notes may not develop.

The Tranche 3 Notes represent a new issue of securities and the Original Notes only have been issued recently for which there is currently no established trading market. Although the Issuer intends to obtain admission of the Notes to trading on the Euro MTF of the Luxembourg Stock Exchange, there can be no assurance that a market for the Notes will develop or, if it does develop, continue or that it will be liquid, thereby enabling investors to sell their Notes when desired, or at all, or at prices they find acceptable.

The development or continued liquidity of any secondary market for the Notes will be affected by a number of factors including the creditworthiness of the Issuer as well as other factors such as the time remaining to maturity of the Notes, the outstanding amount of the Notes and the redemption features of the Notes. Such factors will also affect the market value of the Notes.

The specific risk is that Holders may not be able to sell Notes readily or at prices that will enable investors to realise their anticipated yield.

The trading market for debt securities may be volatile and may be adversely impacted by many events.

The market for debt securities issued by the Issuer is influenced by a number of interrelated factors, including economic, financial and political conditions and events in Germany and other jurisdictions in which the Issuer is active as well as national and global economic conditions and, to varying degrees, market conditions, interest rates, currency exchange rates and inflation rates in other European and other industrialised countries. There can be no assurance that events in Germany, UK, Europe, the US or Asia or elsewhere will not cause market volatility or that such volatility will not adversely affect the market price of the Notes or that economic and market conditions will not have any other adverse effect.

The specific risk is that the price at which an investor in the Notes will be able to sell the Notes prior to maturity date of the Notes may be at a discount, which could be substantial, from the issue price of the Notes or the purchase price paid by such investor which in turn may result in a Holder's loss of the investment in the Notes.

1.2.3 Taxation risks relating to the Notes

The Notes are subject to a risk of early redemption, since the Issuer has the right to redeem the Notes prior to maturity if the Issuer is required to pay additional amounts on the Notes for reasons of taxation.

The Issuer has the right to call the Notes prior to the maturity date of the Notes if the Issuer is required to pay additional amounts on the Notes for reasons of taxation as set out in the Terms and Conditions.

The specific risk is that if the Issuer redeems the Notes prior to maturity date of the Notes a Holder is exposed to the risk that due to such early redemption his investment will have a lower than expected yield which in turn may result in a Holder's loss of investment in the Notes. Also, in case of an early redemption of the Notes, a Holder may only be able to reinvest on less favourable conditions as compared to the original investment which in turn may result in a Holder's lower yield than expected or even a negative yield.

Financial Transaction Tax.

On 14 February 2013, the European Commission published a proposal (the "**Commission's Proposal**") for a Directive for a common financial transactions tax (the "**FTT**"). According to the Commission's Proposal, the FTT shall be implemented in certain EU Member States, including Germany (the "**Participating Member States**").

Pursuant to the Commission's Proposal, the FTT shall be payable on financial transactions provided that at least one party to the financial transaction is established or deemed established in a Participating Member State and there is a financial

institution established or deemed established in a Participating Member State which is a party to the financial transaction, or is acting in the name of a party to the transaction. The FTT shall, however, not apply to (*inter alia*) primary market transactions referred to in Article 5(c) of Regulation (EC) No 1287/2006, including the activity of underwriting and subsequent allocation of financial instruments in the framework of their issue. Thus, the issuance of the Notes should not be subject to the FTT.

The rates of the FTT shall be fixed by each Participating Member State but for transactions involving financial instruments other than derivatives shall amount to at least 0.2 per cent. of the taxable amount. The taxable amount for such transactions shall in general be determined by reference to the consideration paid or owed in return for the transfer. The FTT shall be payable by a financial institution established or deemed established in a Participating Member State which is a party to the financial transaction, acting in the name of a party to the transaction or where the transaction has been carried out on its account. Where the FTT due has not been paid within the applicable time limits, each party to a financial transaction, including persons other than financial institutions, shall become jointly and severally liable for the payment of the FTT due.

Germany has recently submitted a new proposal. Nevertheless, the FTT remains subject to negotiation between the Participating Member States and was (and most probably will be) the subject of legal challenge. In light of the differing views on the scope of the FTT, the final concept may still be adopted and be altered prior to its adoption, the timing of which still remains unclear. Moreover, once any directive has been adopted (the “**Directive**”), it will need to be implemented into the respective domestic laws of the still Participating Member States and the domestic provisions implementing the Directive might deviate from the Directive itself. Finally, additional EU Member States may decide to participate. Alternatively, some Member States might even decide to introduce their own national FTT.

The specific risk is that the FTT may result in a negative tax treatment applied to the Notes which in turn may result in a Holder’s loss of investment in the Notes. Therefore, potential investors should consult with their tax advisors with regard to the tax treatment in the context of investing in the Notes.

2. USE OF PROCEEDS

The net proceeds from the issue of the Tranche 3 Notes, after deduction of commissions, fees and estimated expenses is expected to be approximately EUR 101,952,054.79. Such proceeds are intended to be used for

- (a) general corporate purposes, and
- (b) potential future acquisitions.

4.3 SELECTED KPIs AND NON-IFRS MEASURES

The following key performance indicators and other financial information set out in the tables below include financial measures that are not defined by IFRS (each a Non-IFRS Measure) and may not be directly comparable to similar measures used by other companies. The Issuer believes this information, along with comparable IFRS measurements, is useful to the investors as it provides a basis for assessing its performance, payment obligations related to performance-based compensation as well as its compliance with covenants. Non-IFRS financial measures should not be viewed or interpreted as a substitute for financial information presented in accordance with IFRS. The tables also include reconciliations of the Non-IFRS financial measures to the financial measures that the Issuer believes are the most directly comparable measures prepared in accordance with IFRS.

5. PRO FORMA OF CONSOLIDATED FINANCIAL INFORMATION OF AGGREGATE HOLDINGS S.A.

The expected effects of the de-consolidation as a result of the sale (the “**Sale**”) of a majority stake in Consus Real Estate AG (“**Consus Real Estate**” and, together with its subsidiaries, the “**Consus Group**”), a public stock corporation (*Aktiengesellschaft*) incorporated under the laws of Germany, by the ADLER Group S.A. (the “**ADLER Group**”) and the acquisition of shares in the ADLER Group are presented below on the basis of *pro forma* financial information.

5.1 INTRODUCTION

On 15 December 2019, the ADLER Group entered into various share purchase agreements with minority shareholders of Consus Real Estate (the “**Share Purchase Agreements**”) to acquire 22.18% of the shares in Consus Real Estate, which, as a result of the completion of the ADLER Group’s business combination with Adler Real Estate, increased to a shareholding of 25.75%. Furthermore, the ADLER Group entered into a call/put-option agreement with Aggregate Holdings S.A. (“**Aggregate**”) for its 69,619,173 shares, equalling a controlling stake of approx. 51 *per cent.* in Consus Real Estate (as amended, the “**Call/Put-Option Agreement**”).

On 29 June 2020, the ADLER Group exercised its call option for Aggregate’s 69,619,173 shares in Consus Real Estate (the “**Call Option Exercise**”). As part of the settlement of the call option, the ADLER Group issued 1,946,093 new shares and transferred 14,692,889 existing shares previously held by ADLER Real Estate AG to Aggregate in exchange for its 69,619,173 shares in Consus Real Estate. As a result, Aggregate held a total of 16,638,982 shares, representing approximately 22.5% of the ADLER Group, and the ADLER Group held approximately 65.1% in Consus Real Estate and thus gained control of Consus Real Estate.

On 2 July 2020, the ADLER Group announced a fully underwritten rights issue of EUR 450 million (the “**ADO Capital Increase**”) which was successfully completed by 21 July 2020. Aggregate participated in the ADO Capital Increase by exercising its subscription rights. The subscription ratio to existing shareholders of the ADLER Group was 5:12 with a subscription price of EUR 14.60 per share. Aggregate subscribed to additional 6,932,909 shares, which brought its total holdings to 23,571,891 ADLER Group shares. Following the ADO Capital Increase, a total of 104,785,930 the ADLER Group shares are outstanding with Aggregate’s stake maintained at approximately 22.5%.

Since the transactions described above are expected to have a material impact on the financial position and results of operations of Aggregate, the following unaudited *pro forma* consolidated balance sheet (the “**Pro Forma Consolidated Balance Sheet**”) (see Column D of the table “Pro Forma Consolidated Balance Sheet” below), unaudited *pro forma* consolidated income statement (the “**Pro Forma Consolidated Income Statement**”) (see Column C of the table “Pro Forma Consolidated Income Statement” below) and unaudited *pro forma* selected KPIs and Non-IFRS-Measures (“**Pro Forma KPIs and Non-IFRS Measures**”) and together with the Pro Forma Consolidated Balance Sheet and the Pro Forma Consolidated Income Statement, the “**Pro Forma Financial Information**”) were prepared by Aggregate. The Pro Forma Financial Information shown in the following tables reflects a simulation of how the Issuer’s consolidated balance sheet and consolidated income statement would have looked like if (1) the Call Option Exercise on its controlling stake in Consus Real Estate and (2) the ADO Capital Increase with Aggregate’s participation had occurred on 31 December 2019 for purposes of the Pro Forma Consolidated Balance Sheet and on 1 January 2019 for the Pro Forma Consolidated Income Statement, respectively.

The Pro Forma Financial Information are based on assumptions and bear uncertainties and, thus, do not represent the actual performance of the financial development of Aggregate and the results of its operations and its cash flows as neither the Call Option Exercise nor the ADO Capital Increase were already successfully completed as of 31 December 2019. Furthermore, the Pro Forma Financial Information should not be considered as an indicator for the future performance of the financial position of Aggregate and the results of its operations and its cash flows post completion of the Call Option Exercise and the ADO Capital Increase.

There have been other subsequent material transactions since 31 December 2019, which are not reflected in the Pro Forma Financial Information, which, however, have been disclosed in Aggregate’s audited consolidated financial statements for the financial year 2019 as well as section 6.4.1 and 6.4.2 of this Offering Memorandum.

The Pro Forma Financial Information should only be read in conjunction with the historical audited consolidated financial statements of Aggregate as of and for the fiscal year ended 31 December 2019. The Pro Forma Financial Information are not meaningful on a stand-alone basis.

5.2 HISTORICAL FINANCIAL INFORMATION

The preparation of the Pro Forma Financial Information are based on the following underlying information:

- Aggregate’s audited and published consolidated financial statements as of and for the year ended 31 December 2019, prepared in accordance with IFRS as adopted by the European Union (the “**Aggregate Financials 2019**”); and

- the Consus Real Estate audited and published consolidated financial statements as of and for the year ended 31 December 2019, prepared in accordance with IFRS as adopted by the European Union and audited by KPMG AG Wirtschaftsprüfungsgesellschaft (the “**Consus Financials 2019**”).

With regard to the accounting policies applied consistently to the underlying historical financial information of the Pro Forma Financial Information, reference is made to the consolidated financial statements of Aggregate as of and for the fiscal year ended 31 December 2019.

5.3 BASIS FOR PREPARATION

Aggregate and Consus Real Estate have each prepared their consolidated financial statements in accordance with IFRS as adopted by the European Union. The purchase price allocation (in accordance with IFRS 3) has not yet been completed at the time of this transaction.

The Pro Forma Financial Information were prepared based on information available as well as certain assumptions of Aggregate as described below. The preparation was solely conducted for illustrative purposes. Due to their nature, the Pro Forma Financial Information present only a hypothetical situation and not the actual status of the Group.

The Pro Forma Financial Information are presented in Euro. Unless otherwise stated, all figures have been rounded to the nearest € thousand. The presentation of the Pro Forma Financial Information in € thousand may result in rounding differences.

5.4 PROCEDURES AND ASSUMPTIONS

The Pro Forma Financial Information have been prepared based on the assumption that (i) the Call Option Exercise and (ii) the ADO Capital Increase had been successfully completed as of 31 December 2019 for purposes of the Pro Forma Consolidated Balance Sheet and 1 January 2019 for purposes of the Pro Forma Consolidated Income Statement and (iii) a share price of EUR 32.1 for the ADLER Group as of 31 December 2019. Accordingly, Consus Real Estate was deconsolidated with its assets and liabilities derecognized whilst the value of shares in the ADLER Group received following the Call Option Exercise have been recognized within the Pro Forma Financial Information.

Thus, the pro forma figures have been prepared on the basis of the Issuer’s audited consolidated financial statements as of and for the year ended 31 December 2019 (see Column A in the tables below). In respect of the Pro Forma Consolidated Balance Sheet, in a first step, Consus Real Estate was deconsolidated and derecognised as asset per year end 31 December 2019 (see Column B of the table “Pro Forma Consolidated Balance Sheet” below) and in a second step the total value of all shares received in the ADLER Group was recognised and included (see Column C of the table “Pro Forma Consolidated Balance Sheet” below). In this context, the value of the total number of ADLER Group shares received was determined as the sum of the values of (i) the 16,638,982 ADLER Group shares received as a result of the Call Option Exercise valued at the ADLER Group’s closing price of EUR 32.1 per share as of 31 December 2019 and (ii) the additionally subscribed 6,932,909 shares in the ADO Capital Increase valued at the subscription price of EUR 14.60 per share as per terms and conditions of the rights issue. As a result, the Issuer’s shareholding in the ADLER Group with in total 23,571,891 shares was recognised in the *pro forma* figures with a total value of EUR 635.332 million as per year end 31 December 2019. In respect of the Pro Forma Consolidated Income Statement, the result from the disposal of Consus Real Estate was recognised as profit (see Column B of the table “Pro Forma Consolidated Income Statement” below).

The Pro Forma Financial Information do not include deferred tax effects as a result of accounting policy adjustments or other adjustments resulting from the Call Option Exercise. Income tax effects are not considered.

No effects of the conversion of stock options were taken into account for purposes of the Pro Forma Financial Information.

The Pro Forma Financial Information was prepared for illustrative purposes only and addresses a hypothetical situation and, therefore, does not represent Aggregate’s actual results of operations. It is not necessarily indicative of the results of operations that would have occurred during the periods presented if the simulation adjustments actually had taken place as of the dates specified, nor is it necessarily indicative of future results of operations, financial positions or cash flows.

6. BUSINESS OF THE GROUP AND PRINCIPAL MARKETS

6.1 OVERVIEW

Aggregate Holdings S.A. (“**Aggregate**”) is a real estate investment company, with business interests mainly in the German real estate market but also in the wider German-speaking region and Portugal. Aggregate aims to become one of the leading investment real estate companies in Germany and the region, focused on cash-flow yielding assets, development and financial real estate assets.

As a general business model, the Group is actively screening investment opportunities in either large-scale residential or commercial real estate developments, but often mixed-use projects creating vibrant neighbourhoods. Following a rigorous due diligence process, development projects are often acquired at value accretive “off market” prices and then developed by the Group itself.

As a fully integrated platform, the Group covers the entire real estate development value chain when investing in projects with robust fundamentals and strong growth prospects. From project acquisition and due diligence to financing, planning and development, all phases are managed by highly experienced management teams with a strong operational and transactional track record and supported by dedicated local teams. Projects are either built to hold for the long-term to let them out and generate rental income (“**Build & Hold**” business segment), or built to-sell to investors, often on the basis of forward sales at the beginning or during construction phase (“**Build & Sell**” business segment).

Additionally, the Group is an active investor in financial real estate assets (“**Financial Real Estate Assets**” segment). Besides a liquid treasury portfolio of generally tradeable, listed securities and fund shares in real estate assets and opportunistic short-term (often secured) lending to third parties and investments in connection with real estate development projects, the core and strategic long-term investment in its portfolio is the stake of the Group in the ADLER Group S.A. (the “**ADLER Group**”). As of the date of this Offering Memorandum, the Group holds approximately 22.5% of the voting rights in the ADLER Group following the call option exercise by the ADLER Group on 29 June 2020 and is the largest shareholder in the ADLER Group. After completing the acquisition of Adler Real Estate AG and Consus Real Estate AG, the ADLER Group is expected to be the fourth largest listed residential real estate platform in Europe with a significant footprint in Berlin, Cologne, Düsseldorf, Frankfurt am Main, Hamburg, Munich and Stuttgart (“**Top 7 Cities**”) and a strong growth pipeline in Germany’s urban centres.

For the financial year ended 31 December 2019, the Group generated a net profit of EUR 57,526 thousand compared to EUR 10,889 thousand for the financial year ended 31 December 2018. On 31 December 2019, the total assets of the Group amounted to EUR 7,311,752 thousand and the equity attributable to the owners of the Group were EUR 1,699,196 thousand compared to total assets of EUR 5,014,006 thousand and equity attributable to the owners of the Group of EUR 735,049 thousand on 31 December 2018.

On 31 December 2019, the *pro forma* total assets of the Group amounted to approximately EUR 3.6 billion, of which approximately EUR 944 million derived from its Financial Real Estate Assets segment. On 31 December 2019, the *pro forma* LTV-Ratio of the Group stood at approximately 35.9%. The Group targets a medium-term LTV of around or below 50%. After the de-consolidation of Consus Real Estate, the Group develops projects with a gross construction area of approximately 865,000 sqm, and a gross development value of approximately EUR 6.3 billion as of 30 June 2020.

6.2 BUSINESS MODEL AND STRATEGY

Aggregate’s business model can be divided into three main segments with a focus on Germany, Portugal and German-speaking countries:

- (a) **Build & Hold:** The Group operates as real estate developer and holds the developed properties as long-term holdings in its portfolio with the purpose of rental income and cash flow generation;
- (b) **Build & Sell:** The Group operates as real estate developer focused on the construction and sale of real estate to third-party buyers (mainly via forward sales) and the creation of entire fully-integrated platforms; and
- (c) **Financial Real Estate Assets:** Aggregate operates as investor in private or public real estate investments where there is an opportunistic / value-add or long-term investment proposition.

Country exposure (Yielding assets + GDV)*

Market value distribution of tangible assets**

*GDV not including other assets, which are largely located in Germany

**Market value break-down does not include Herdadedo Pinheiro/ Comporta project by VIC Properties S.A. (acquisition completed 30 April 2020)

With its business model Aggregate targets attractive returns within the real estate markets. Key advantage is the established real estate know-how and the proven knowledge in accessing both equity and debt capital markets as well as the strong network of the group, which provides continuous access to off-market investment opportunities, often for undervalued assets and special situations, that are often not publicly available.

The company believes that the current environment provides for significant opportunities to acquire high quality assets at attractive valuations.

The following chart shows the *pro forma* figures of each segment calculated by the Issuer:

The chart below illustrates the effective capital recycling in connection with the Group's Build & Sell segment.

As of 31 December 2019, EUR 1.408 billion of the Issuer's total assets were attributable to the Build & Sell business segment and EUR 408 million of the Issuer's total liabilities. Furthermore, as of 31 December 2019, EUR 71 million of the Issuer's minority interest was attributable to the Build & Sell business segment. Therefore, as of 31 December 2019, the NAV of the Build & Sell segment was EUR 929 million.

VIC Properties

VIC Properties S.A., a fully owned and controlled subsidiary of the Group, is one of Portugal's leading real estate developers with a focus on large scale development schemes and mainly residential projects.

VIC's business model is to source large-scale construction projects and subsequently to develop, design, construct and market such developments to individual but also institutional investors, often on a forward sale basis at the start or during the construction phase. region. Given its in-house local development expertise, capital markets knowledge and wide experience in large development schemes, it specialises in the development of entire neighbourhoods with a view of developing high quality but affordable real estate offerings, with an emphasis on mid-sized units with two or three bedrooms. VIC is offering new living concepts, including newest technological features, modern kitchens in open-space living room designs, panoramic balconies or terraces and generous communal areas. It is anticipated that no more than 20% of VIC's real estate portfolio will be outside of its geographic and sector target markets. Targeted buyers include the domestic Portuguese demand as well as international investors. The targeted EBITDA margin for VIC upon stabilisation, is forecasted at approximately 25%.

Domiciled in Luxembourg, but with operational headquarters and locally embedded management team in Lisbon, VIC benefits from strong local market access and connections in the strong Portuguese real estate market. VIC's access to capital market financing as well as traditional bank lending, means that it is well placed to capture market opportunities and large-scale projects which due to high market entry barriers, may typically be inaccessible to local and international competition. VIC aims to fund its investments using a mixture of equity and debt financing.

The strong value generation of VIC lies in the creation of its development platform since 2018 through deep in-country relationships and acquisitions of large-scale projects at undervalued prices. As of fiscal year-end 2019, the combined value of VIC's development assets PRATA and MATINHA was EUR 581 million and including the EUR 223 million market value of its newest acquisition PINHEIRINHO located in the Comporta region (completed in April 2020), the current valuation of VIC's portfolio of development assets is EUR 804 million, all based on fiscal-year 2019 rent and cost estimates. The current combined estimated completion value of all three projects as measured by GDV is EUR 2.4 billion, with a targeted combined completion value uplift estimated at approximately +20% once all projects are sold and completed. The plan prices for PRATA, MATINHA and PINHEIRINHO are 5,270 EUR/sqm, 5,447 EUR/sqm and 3,601 EUR/sqm respectively and a totalling 4,739 EUR/sqm for VIC's portfolio.

Following deep structural reforms in the aftermath of the financial crisis of 2008/2009, Portugal's economy has recovered strongly with GDP growth firmly established above the EU average growth rate in recent years and households benefitting from continuous increases of disposable income and low unemployment rates over the years. As a highly competitive country, nowadays, with friendly low tax regimes for corporates, entrepreneurs, pensioners and wealthy individuals, a strong influx of global companies, investors, expats, pensioners and professionals is contributing strongly to Portugal's economic success. Since 2009 Portugal's real estate market has been underserved with limited new built supply of residential offerings. This structural imbalance between lack of supply and increased demand by a rising Portuguese middle class and international purchasers for modern, newly built residential units is providing for an opportunity for investment profits for VIC with its residential offerings.

Following a booming property market and relatively high price increases in recent years, housing prices in Lisbon are still lower when compared in an international context and more affordable than those in most other major European cities, such as London, Paris, Madrid, Barcelona, Amsterdam, and Berlin (Source: Savills). Aggregate expects that the newly built and refurbished housing offerings supplied to the market will, over time, create a greater balance between demand and supply. Aggregate believes that closing this structural gap will provide for a healthy real estate market in the coming years with less steep but stable price increases.

VIC currently develops three large-scale projects: (1) Prata Riverside Village ("PRATA"); (2) Matinha ("MATINHA") and (3) Pinheirinho ("PINHEIRINHO") with a combined EUR 2.4 billion gross development value ("GDV"), EUR 804 million gross asset value ("GAV") and approximately 571,000 sqm gross construction area ("GCA").

In 2018, VIC acquired *Fundo de Investimento Imobiliário Fechado Lisfundo*, a fund vehicle owning one of Lisbon's most famous large-scale residential development projects - PRATA. This architectural project, designed and planned by the world-renowned Italian architect Renzo Piano, is currently the largest ongoing residential project under construction in Lisbon, Portugal. Following this acquisition, VIC established itself as a leading residential property developer with a clear focus on large-scale development projects across the main cities in Portugal. PRATA has a gross development value of approximately EUR 559 million, a gross asset value of approximately EUR 235 million and a gross construction area of c.128,500 sqm. The majority (79.8%) of PRATA's GCA is allocated to residential space. The remaining 20.2% of PRATA's GCA are allocated to retail (13.3%), office (5.5%) and other (1.4%) space. Of the residential units that are under construction, all 781 units will be directly located on the Tagus river, with construction expected to complete by 2023. The average price of initial residential sales for PRATA exceeds EUR 6,000/sqm. Plot 8 (of a total of 11 land plots) of PRATA has been completed and sold and the underground infrastructure of all land plots was completed in December 2018. Construction of plot 7 started in January 2019 and was the first plot constructed by VIC in full. Construction of plot 1 and 2 commenced in October 2019 and in March 2020 respectively.

In June 2019, VIC acquired the large plot of land MATINHA which is neighbouring PRATA and also located directly alongside the river Tagus. MATINHA is the largest residential neighbourhood project in Lisbon with c. 245,000 sqm of GCA, a GDV of EUR 1.2 billion and a GAV of EUR 346 million. The property is expected to provide with approximately 2,000 living spaces, enriched by a number of retail and restaurant areas, a hotel and commercial/office units. Its premium

location at the river Tagus is connecting PRATA and Parque das Nações. The preoperational works for this project already started in 2020 with the environmental study having been completed at the beginning of the year and land decontamination and infrastructure works having commenced as well during the first half year of 2020. The MATINHA project is expected to complete by 2027.

The following table provides a breakdown of the expected GCA and gross sellable area for the MATINHA project as of 31 December 2019.

PRATA and MATINHA are both strategically well-located in Marvila, one of the most up-and-coming neighbourhoods of Lisbon. Both projects are predominantly residential constructions offering modern living spaces with a high-end quality and located in one of the emerging locations of Lisbon along the river Tagus and adjacent to the Parque das Nações.

In April 2020, VIC acquired PINHEIRINHO, a new land plot located in Melides, in the municipality of Grândola with a GAV of approximately EUR 223 million and GDV of EUR 656 million and a deployment area of c. 197,000 sqm GCA for villas, town houses, boutique hotels and a 5-star hotel with an already completed 18 hole golf course and direct access to the beach. The development permit for this project has already been granted. VIC has already started the procurement process to start construction on the PINHEIRINHO project in the 1st quarter of 2021 with a number of different types of villas, the refurbishment of the golf club house and to finish the infrastructures and landscape works.

In addition, four new projects were identified for VIC’s pipeline with a total GDV of EUR 1.3 billion and c. 444,000 sqm GCA. If realised, VIC plans to use 80% of the pipeline’s GCA to construct residential properties, with the remaining 20% being used to construct, retail property, social housing and hotels.

6.2.4 Financial Real Estate Assets

Aggregate invests in private or public real estate assets. Aggregate mainly focuses on liquid assets in this segment, either short-term and opportunistic or long-term and strategic in nature. Accordingly, Aggregate invests in listed equities, listed bonds, listed funds and short-duration real estate related loans, often secured by the underlying real estate asset. Investing in liquid and tradeable securities as well as short-duration loans allows Aggregate to build a portfolio that is diversified across a number of investments, exposed to real estate assets, value accretive and liquid. The core of this segment is Aggregate’s long-term and strategic ownership of approximately 22.5% of the voting rights in the ADLER Group S.A. (the “**ADLER Group**”).

As of 31 December 2019, EUR 1.129 billion of the Issuer’s total assets were attributable to this segment and EUR 314 million of the Issuer’s total liabilities. Furthermore, as of 31 December 2019, EUR 1 million of the Issuer’s minority interest was attributable to this segment. Therefore, as of 31 December 2019, the NAV of the Financial Real Estate Assets segment was EUR 816 million.

ADLER Group S.A. investment

On 15 December 2019, Aggregate entered into a call/put option agreement with the ADLER Group to sell 50.97% of the shares in Consus Real Estate AG (“**Consus Real Estate**”), representing 69,619,173 shares of Consus Real Estate. On 29 June 2020, the ADLER Group exercised the call option for the Consus shares and Aggregate received approximately 22.5% of the voting rights in the ADLER Group as consideration.

The ADLER Group specialises in and focuses on the purchase, management and development of income-producing multi-family residential real estate. As of 30 June 2020, the ADLER Group together with ADLER Real Estate Aktiengesellschaft (“**ADLER**”) and their subsidiaries had a portfolio value of approximately EUR 8.8 billion and their property portfolio consisted of 74,682 residential units with a total residential lettable area of 4,709,519 sqm, which includes 2,332 commercial units (retail, office and other commercial) and 17,610 parking spaces and spaces for storage, antennas, etc.

Following the exercise of the call option by the ADLER Group on 29 June 2020, the ADLER Group issued 1,946,093 new shares and transferred 14,692,889 existing shares previously held by the ADLER Group to Aggregate in exchange for 69,619,173 shares in Consus Real Estate. As a result, Aggregate holds approximately 22.5% in the ADLER Group and the ADLER Group is the majority shareholder of Consus Real Estate as of the date of this Offering Memorandum.

Moreover, the ADLER Group intends to make an offer to all Consus Real Estate's shareholders to acquire their Consus Real Estate shares by way of a voluntary public tender offer in the form of an exchange offer (the "**Consus Tender Offer**"). In connection with the Consus Tender Offer, the ADLER Group has received irrevocable undertakings from Consus Real Estate shareholders representing a total of approximately 21.1% of Consus Real Estate's share capital, to tender their shares into the Tender Offer, resulting in a shareholding of at least 85.6% in Consus at the launch of the Tender Offer. Alternatively, in relation to one Consus Real Estate shareholder holding in aggregate 20.5% in Consus Real Estate, ADLER Group may enter into a share purchase agreement regarding such shareholding in lieu of such shareholder accepting the offer. Consus Real Estate has a growth path of EUR 8 billion GDV of developments in Germany's core cities.

On 2 July 2020, ADO Properties (renamed to ADLER Group S.A.) announced a fully underwritten rights issue of EUR 450 million (the "**ADO Capital Increase**") which was successfully completed by 21 July 2020. Approximately 98% of subscription rights were exercised, including Aggregate's participation in the rights issue. The subscription ratio to existing shareholders of the ADLER Group was 5:12 with a subscription price of EUR 14.60 per share. Aggregate subscribed to additional 6,932,909 shares, which brought its total holdings to 23,571,891 ADLER Group shares. On 21 July 2020 the remaining ADLER Group shares of less than 0.8 million were also successfully placed in a rump placement at the previous day's closing price of EUR 24.50. Following the ADO Capital Increase a total of 104,785,930 ADLER Group shares are outstanding with Aggregate's stake maintained at approximately 22.5% and valued at approximately EUR 600 million post completed rights issue.

Through the completed acquisition of ADLER and Consus Real Estate, the ADLER Group plans to consolidate its position as a leading German residential player and becomes the fourth largest listed European residential real estate company based on the combined gross asset value ("**GAV**") with a significant footprint in the Top 7 Cities, providing a strong platform for growth. Following the proposed acquisitions, the ADLER Group, ADLER and Consus Real Estate will have a combined GAV of approximately EUR 14 billion (based on the ADLER Group's and ADLER's combined gross asset value of EUR 8.9 billion (including EUR 0.3 billion of inventory and PP&E) and the approximately EUR 4.7 to 5.3 billion of *pro forma* GAV of Consus Real Estate based on management estimates). The ADLER Group, ADLER and Consus Real Estate is expected to have, when execution fully completed, a combined net rental income of approximately EUR 520 million to 540 million, an EBITDA of between EUR 385 to 405 million and an approximate total rental area of between 5.5 million to 5.6 million sqm, with each square meter being valued at approximately EUR 2,500 and yielding approximately EUR 8 of rent per sqm based on current values. Moreover, approximately 65% of the combined portfolio of the ADLER Group, ADLER and Consus Real Estate will be located in the Top 7 Cities and will consist of over 76,000 rental units.

Aggregate believes that the acquisition of Consus Real Estate by the ADLER Group is a strategic move to consolidate the ADLER Group as a leading player in Germany's key residential markets, is accretive to long term net asset value ("**NAV**") of the ADLER Group and the ADLER Group's funds from operations upon completion of the build-to-hold, and positions the ADLER Group to benefit from long-term growth opportunities. As the largest shareholder of the ADLER Group, Aggregate is well positioned to benefit from the shareholder value creation. Consus Real Estate is expected to have post the construction of its landbank a combined net rental income of approximately EUR 160 million to EUR 180 million, an EBITDA of between EUR 140 million to EUR 160 million and a total rental area of between 780,000 to 820,000 sqm. Each square meter is approximately valued at between EUR 5,800 to EUR 6,000, yielding between EUR 17 to 19 per sqm. The current EUR 1 billion landbank is expected to yield a GAV of between EUR 4.7 billion and EUR 5.3 billion at the completion of the development, representing a EUR 1 billion to EUR 1.6 billion gain. Whilst the Consus Real Estate landbank is developed to form yielding assets, the remaining develop-to-sell projects will continue to generate cashflows for the ADLER Group.

6.3 SOURCES OF LIQUIDITY AND CASHFLOW

Aggregate is a holding company and does not conduct its operating business itself but does so through its subsidiaries. Consequently, its cashflows and liquidity are derived from different sources of income from its subsidiaries and investments. While the project developments of its two main subsidiaries are in the development phase, Aggregate's cashflow generation is based on income generated from a well-diversified and liquid real estate portfolio. Aggregate has the following sources of cashflow:

- (1) **Dividends:** Aggregate expects to profit from an annual cash flow. The Group is expecting annual dividend payments from its stake in the ADLER Group to amount to approximately EUR 12 to 14 million each year, based on the ADLER Group's public guidance and starting with the dividend payment for the year 2021.
- (2) **Income from financing:** Aggregate benefits from an annual income from granting short-term loans to third parties targeting up to EUR 20 million each year.

- (3) Cash-flow from Net Rental Income (“NRI”): The QH project is expected to generate approximately EUR 75 million of annual NRI at completion (in 2021 estimated at roughly EUR 8 million and then increasing each year until 2023).
- (4) Cash-flow from Forward Sales: VIC Properties S.A. is expected to generate approximately EUR 300 million in the next three years.
- (5) Liquid, opportunistic financial real estate assets: Investing in liquid and tradeable securities as well as short-duration loans allows Aggregate to build a portfolio that is diversified across a number of investments, exposed to real estate assets, value accretive and liquid. As at 2019 year end, Aggregate held approximately EUR 115 million in liquid, tradable securities and approximately EUR 160 million in short-term real estate loans.
- (6) Liquid, strategic financial real estate assets: The 22.5% stake in the ADLER Group would have amounted to a value of EUR 635 million as per 31 December 2019, if determined as sum of the 16,638,982 shares received at ADLER Group option exercise valued at the closing share price of EUR 32.1 for ADLER Group shares as of 31 December 2019 plus the additional shares subscribed in the rights issue valued at the terms of the rights offer.

EUR 282,942,000 aggregate principal amount of Existing Notes have been validly tendered and accepted by the Issuer for exchange for such Original Notes.

Consequently, the outstanding principal amount of the Existing Notes has been reduced by EUR 282,942,000 and thus, a principal amount of EUR 67,058,000 under the Existing Notes are outstanding.

The bondholders of the VIC Convertible Bond may convert the convertible bonds into shares of VIC Properties S.A. The initial conversion price will be set at a premium of 20.0% above the initial reference price which will be determined depending on the timing of the contemplated initial public offering of VIC Properties S.A. and the free float of VIC Properties S.A., as further described in the terms and conditions of the convertible bonds.

VIC Properties S.A. provided an undertaking, among other things, not to incur any debt if, following the use of the net proceeds of any such debt, the loan-to-value ratio would exceed 70%. The convertible bonds included additional covenants and restrictions on subsidiaries, use of proceeds, reporting obligations and others. Furthermore, as long as the VIC Convertible Bond is outstanding, VIC is restricted from paying dividends to Aggregate.

Bondholders have the right to request the early redemption of the convertible bonds on the 3rd and/or 4th anniversary of the issuance of the convertible bonds at the Redemption Amount plus all the remaining interest payments to and including the maturity date.

Even though the initial rapid expansion of the Coronavirus in the European Union has been slowed or contained by various counter-measures, the negative impact on Aggregate's business cannot be adequately determined or reliably quantified as of the date of this Offering Memorandum.
